## Winter 2023

(MPMWC joins Christmas in the Village Parade)

## Winterizing

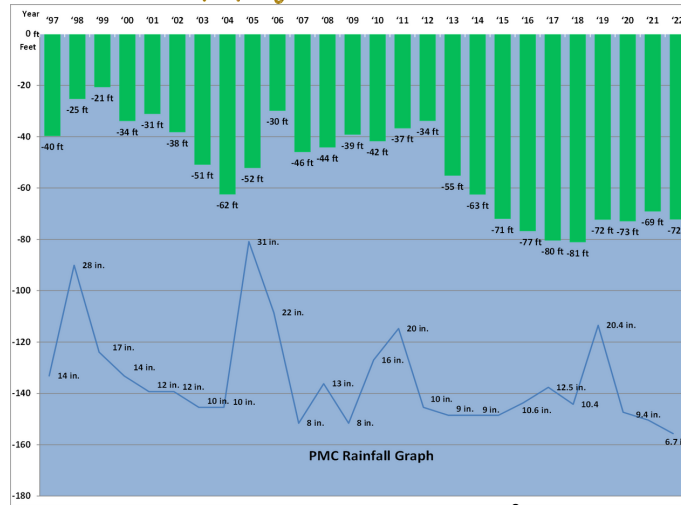

Winter is here! As temperatures drop, remember to protect plumbing and pipes with insulation and use heat tape, especially those in vacant houses. This can prevent residential pipes from freezing and breaking, often causing extensive damage. Please see our winterizing tips on reverse side or visit our website at:

**MPMWC.COM**

If you are planning to be away, call the water company during regular business hours and request the water meter at your property to be shut off.

**Please Call Our Office With Updated Contact Phone Numbers ~ Cell Numbers are Great for Text Messaging from Our Billing Software!**

Happy New Year

## Conservation

Well Sounding – Static Levels

Our PMC aquifer is the only water source we have and is not a limitless supply of water. PMC residents need to continue to conserve. The Water Company greatly appreciates your continue conservation efforts to preserve our precious water source! Above is 24 years of our wells' static levels, with precipitation history. It can take from a year and a half to three years to recharge our aquifer water levels after a wet winter!

Dear Shareholders,  
Thank you for your support and putting your valuable trust in MPMWC for the past 50 years. Although we have tried our best to keep rates affordable, our operating costs have increased significantly due to growing inflation. To ensure we continue to provide the best service MPMWC has made the decision to increase our rates this next fiscal year. Rates will not be known until after the April Board of Directors' meeting. We greatly appreciate your understanding in this situation. Please feel free to contact our office if you have any questions or concerns. Thank you.
