

TWO PROBLEMS SOLVED WITH ONE AMAZING BASS STAND

Is It a Stand? Is It a Chair? It's Both.

Since your bass is at the most risk of damage on the ground of an orchestra pit or dark stage, this Amazing Bass Stand rubber-coated edges protects your instrument from damage when it needs it most.

Used as a stand, it's easy to transport, breaks apart and stores flat and keeps your bass upright.

Used as a chair, it supports 500+ lbs., has a comfortable foam seat and is made of rugged, medium density fiberboard – exterior grade and formaldehyde free. Plus, it's uniquely designed for your feet to rest comfortably for a natural and proper playing position.

For Professionals and Beginners

- Easy to assemble and disassemble
- Helps prevent player fatigue and injuries from improper playing technique
- Height from floor to top of seat: 29-1/4" (74.5 cm)
- Available in smaller sizes for young bassists
- Crafted in the U.S.A

School Orchestra Directors:

Ask us how to replace clunky four-up racks without using your orchestra budget.

Conserving players and their instruments for years to come.
