

HOME SAFETY

- SMOKE DETECTORS
- CARBON MONOXIDE DETECTORS
- BED SHAKERS

Safety Tips

Install smoke alarms on every level of your home, inside bedrooms and outside sleeping areas.

Test smoke alarms every month. If they're not working, change the batteries.

Talk with all family members about a fire escape plan and practice the plan twice a year.

If a fire occurs in your home, **GET OUT, STAY OUT and CALL FOR HELP.** Never go back inside for anything or anyone.

Call Senior Engineer, Ron Anderson with to schedule the installation of your home Smoke Detectors and Carbon Monoxide Detectors. Bed Shakers are also available for the Disabled.

Sheldon Township Fire District * 843-846-9221

Smoke alarms are a key part of a home fire escape plan. When there is a fire, smoke spreads fast. Working smoke alarms give you early warning so you can get outside quickly.

Did you know that if a fire starts in your home you may have as little as two minutes to escape? During a fire, early warning from a working smoke alarm plus a fire escape plan that has been practiced regularly can save lives.

Premise Information

Do you have access information to your home that you would like to share with the fire department so that when we are called to your home, and nobody answers the door, we don't have to cause damage to your door or window in an attempt to gain access? You can have information such as a door code, gate code or lock box location/code added to the dispatch file for your address.
