

ALLUX Interior Solutions

The S1200, S1500 and S3000 systems redefine how interior spaces are structured- pairing refined aluminum-framed sliding doors with a fully tailored delivery model.

ALLUX enhances this capability by supplying custom fabricated door profiles and track systems, precisely cut to suit your projects exact dimensions. This approach streamlines installation, making it more efficient, tidy, and reliable from start to finish.

Ideal for room dividers, closets, full partition walls, or room-within-a-room concepts, the raumplus S1200, S1500, and S3000 Series delivers tailored solutions with ease, combining design flexibility with dependable performance.

Precision, Engineered. Effortlessly Delivered.

With ALLUX, every system is tailored to your project, removing the guesswork and reducing time on site.

Door profiles are manufactured to your specified width and height, while track systems are cut to suit your layout, door count, and configuration. Each order arrives prepared for efficient on-site panel installation, or kit assembly if ordered as preference.

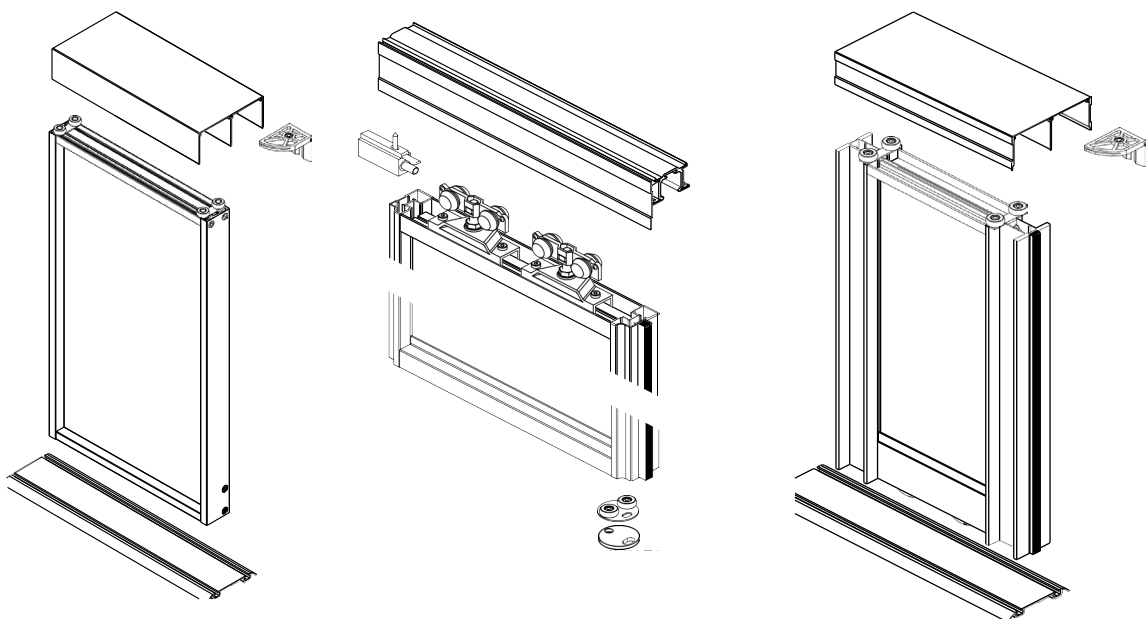

No measuring. Less waste. Faster installation.

A System Built Around You

Your custom package is supplied ready for assembly as kits or installation as assembled panels, dependent on your order.

Assembled Panels with:

- Precision cut vertical door profiles
- Top and bottom horizontal profiles
- Top and bottom track systems
- Complete hardware kit (rollers, fasteners, and soft-close/brake components as specified.)
- Mullions for both structure and visual rhythm (optional)
- Infill Panels as defined within your project specifications.

Built Around Your Project

Every component is prepared to match your exact requirements- ensuring consistency, accuracy, and a seamless fit during installation.

Getting Started

1. Submit Your Project
Provide detailed dimensions and all relevant specifications required for an accurate quote
2. Configuration Review
ALLUX evaluates your layout, including door quantity, track design, and system requirements.
3. Receive Your Custom Quote
A detailed proposal is prepared based on your exact application
4. Fabrication
All profiles and track systems are precision cut to your specifications. Panels may be pre-assembled based on your order needs.
5. Streamlined Installation
Receive your order ready to efficient assembly-saving time on site and ensuring a clean, predictable install.

Designed to Simplify. Built to Preform.

S1200, S1500, and S3000 by raumplus @ ALLUX removes the complexity from custom sliding systems- without compromising architectural integrity, performance, or design expression.
