

NEMAGARD™

WHITE GRUB CONTROL

CONTAINS STEINERNEMA SCARABAEI: NATURE'S BEST DEFENSE AGAINST WHITE GRUBS.

STORAGE INSTRUCTIONS

Store in original packaging in a cool, dark place. Avoid freezing and protect from direct sunlight. Shelf stable for up to three months without refrigeration. Refrigerate at or around 46°F to prolong shelf life.

DIRECTIONS FOR USE

Remove all filters from the application equipment. Do not apply with pesticides. Mix entire contents of package with cool clean water to form a pre-mix spray solution and stir occasionally to ensure thorough mixing. **BACKPACK SPRAYER APPLICATION:** Mix one package into 4 gallons of clean water to form a pre-mix spray solution and ensure the solution is mixed well. Then use 1/2 gallon of the pre-mix spray solution, adding an additional 3-1/2 gallons of clean water for a total of 4 gallons finished spray solution to treat 1,500 sq. ft. Repeat until all pre-mix spray solution is used up. **BOOM SPRAYER APPLICATION:** Partly fill tank with clean water. Start agitator and keep running until application is complete. Mix one package into 4 gallons of clean water to form a pre-mix spray solution and add to the sprayer tank.

Fill tank with required volume of clean water and apply minimum 2 gallons finished spray solution per 1,000 sq. ft.

STANDARD RATE: ONE PACKAGE TREATS 10,000 - 12,000 sq. ft

FOR BEST RESULTS

Apply when soil temperatures are between 53°F and 84°F. For curative treatments apply in the spring when soil temperatures allow. Apply during low light periods. Early mornings or evenings or cloudy sky conditions are best. Water the treated area directly after application with 1/8th of an inch of water. Keep soil moist for up to two weeks after application for the nematodes to get established. Avoid applying to dry or over-saturated soil.

CONTENTS: MINIMUM 225 MILLION S. SCARABAEI BENEFICIAL NEMATODES. COVERS UP TO 10,000 - 12,000 SQ. FT
