

Online Skills Study Sessions

Assessment & Management of the Child with Reduced Conscious Level and the Fitting Child

These online skills study sessions are aimed for paediatric nursing staff around the Yorkshire and Humber region. The sessions will be run through Microsoft Teams to support evidence in Level 1 and Level 2 Critical Care skills that are set within local critical care skills passports and PICS standards.

June 22nd 2021 13:00-14:30

Content and Learning Objectives:

- *Basic anatomy and physiology of the brain*
- *Assessment of conscious level in paediatrics*
- *Signs and symptoms of raised ICP in infants and children*
- *Identify the causes of seizures in children*
- *Management of CSE using the regional pathways*
- *Practical management of the drugs required in the emergency management of seizures*

Any questions and place bookings via MS Teams please e-mail Network Educator,
