onView
INTEGRATED SOLUTIONS

ACTION-CS KEEPS CATALYTIC CONVERTERS SAFE

The Action-CS NAS Cat Guard is our reliable solution to monitor and guard against any illicit attempts on altering your vehicle's exhaust system. This System works in conjunction with our Crime Deterrent Camera Systems, including live monitoring with guard and police dispatch through our partnership with Onview.

The system is comprised of 3 main components:

01

SITE TOUCHSCREEN CONTROLLER

Includes the following functions:

See the status of all vehicle Notifiers

Test each Notifier

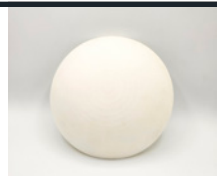

Enroll and remove Notifiers

History log of all events

See live alarms

02

NAS WIRELESS GATEWAY

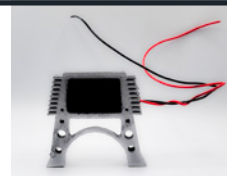

This POE-powered gateway allows Notifiers to securely communicate back to the controller, cameras, and alarm center.

Each gateway covers roughly 5,000 square feet and you can add as many gateways as required to expand the monitored area.

03

NOTIFIERS

There are 2 options for the easy-to-install transmitter sensors that clamp onto the exhaust:

Wired version ties into the vehicle's on-board, 12 volt battery system and draws 1.5amps over 31 days of operation, causing no battery drain

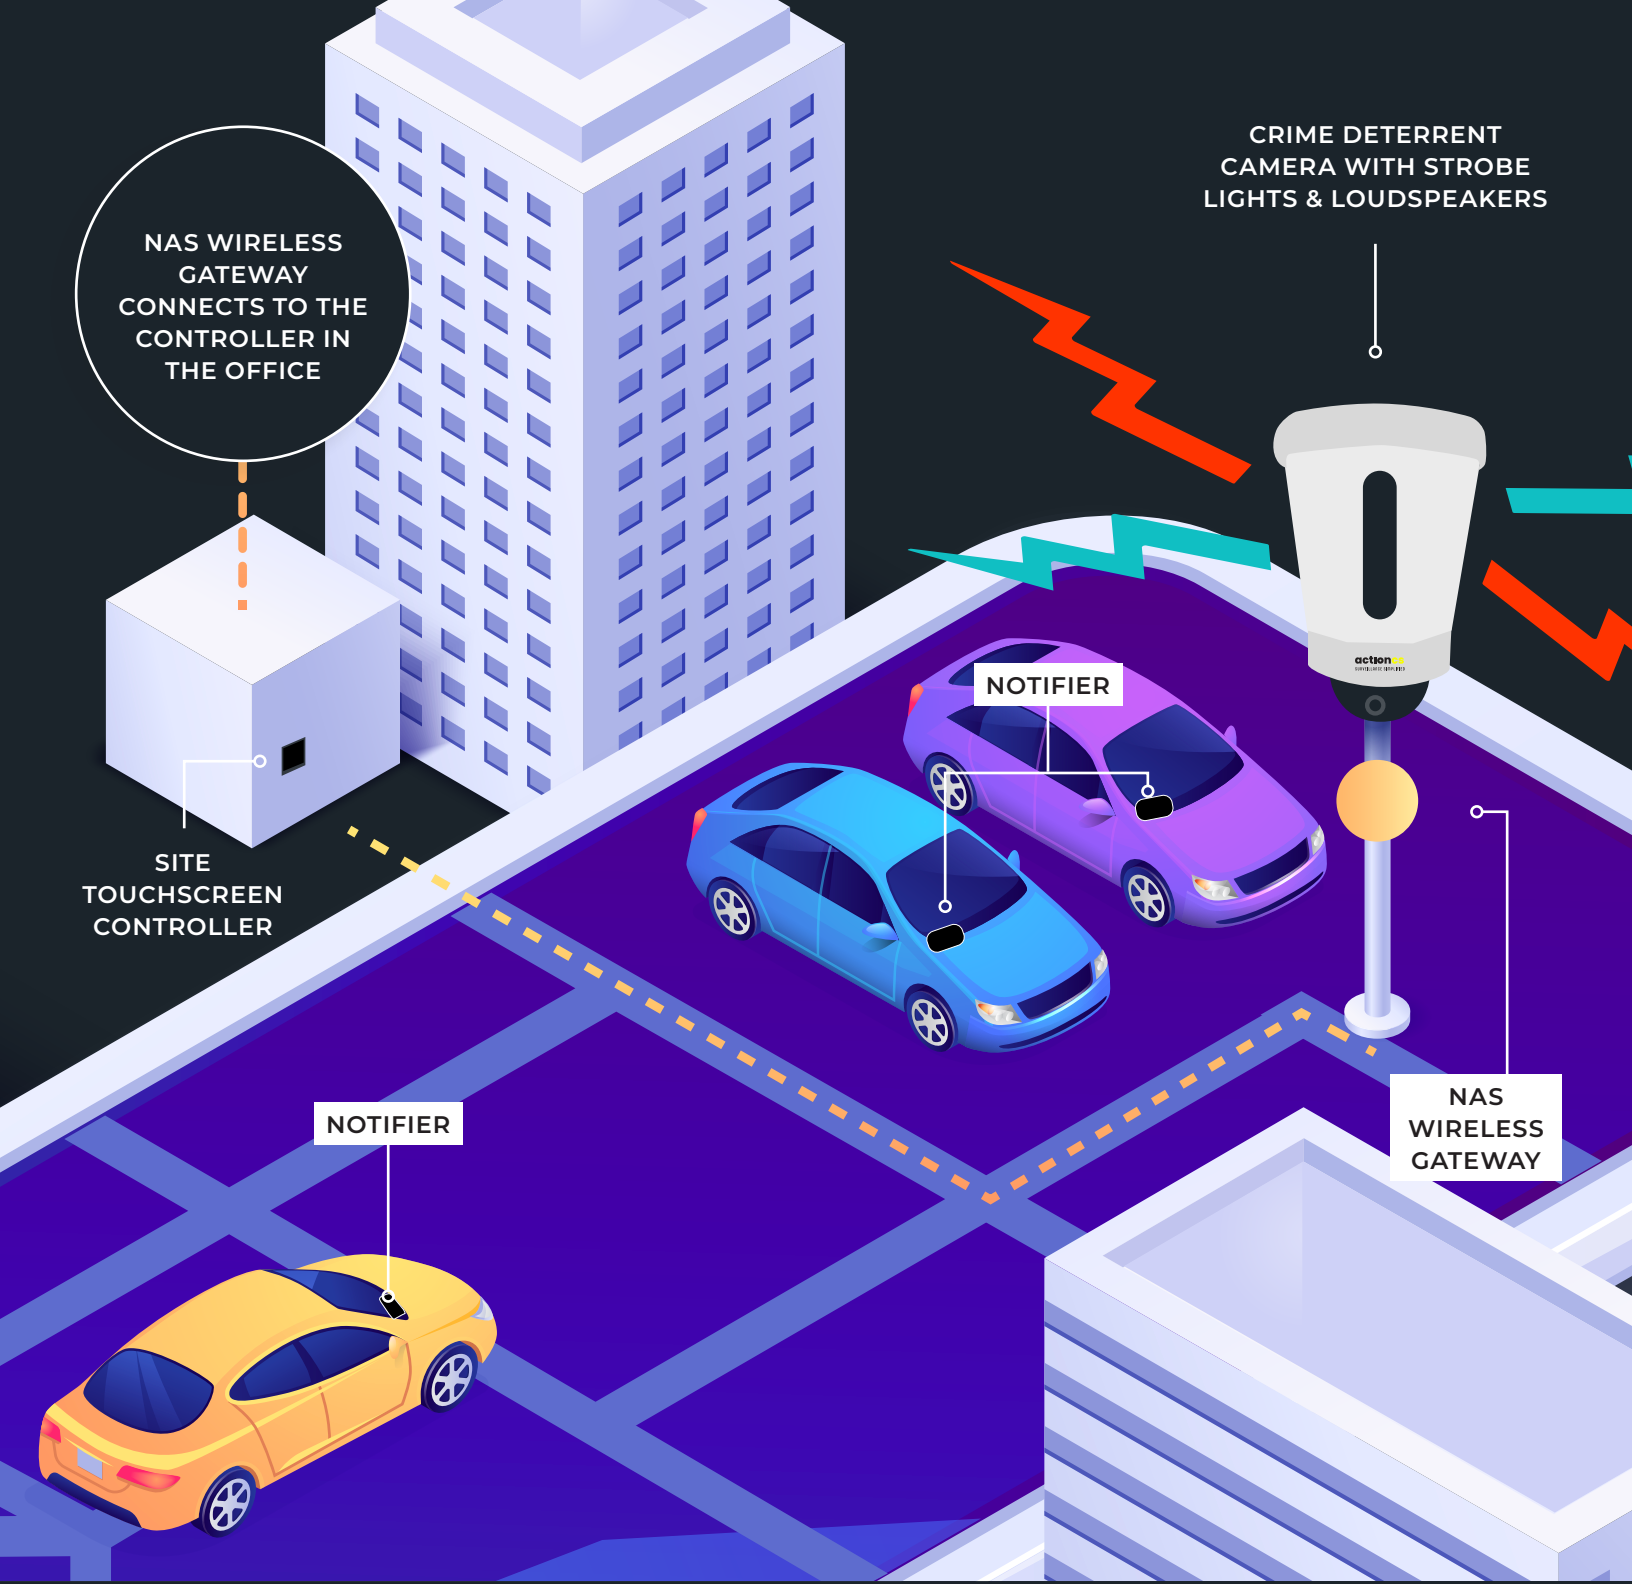

The Lipo battery powered version can run for 90 days before needing to be recharged.

OPERATION IS SIMPLE

Park your vehicle(s) in your service yard

Arm the system

Go home knowing your property is safe and protected — even if your cameras cannot see every inch of your yard!

When a criminal individual tries to cut the exhaust, an alert is sent to the gateway with that vehicle's unique identifier for the controller to process, which then triggers the alarm and red/blue strobe lights on all the exterior Action-CS Active Deterrent Camera Units. The monitoring center then dispatches police or a security guard, even if they cannot see anyone. The agent can also talk down through the cameras to inform the perpetrator that police are on the way.

The system does not get triggered by rodents, other small animals or weather, so false alerts are of no concern. This system is a cost effective and easy-to-install system that adds unique protection to some of your most valuable assets.

SURVEILLANCE SIMPLIFIED

SPECIFICATIONS

Controller

SCREEN	7" Color Touchscreen
POWER	USB-C Powered
NETWORK	Gigabit Ethernet
DIMENSION (W/H/D)	8" x 5.5" x 4"
MOUNTING METHOD	Wall Mount

Gateway

POWER	POE 15.4 Watts
DIMENSION	6" Diameter x 3.5" High
NETWORK	100Mbps POE
IP RATING	IP68
MOUNTING STYLE	Wall Mount

Notifiers

POWER	Battery or Hardwired to Vehicle Battery
DIMENSION (W/H/D)	3.5" x 2.1" x 0.375
CONNECTIVITY	Hardwired or Battery
BATTERY	10,000 Mah Lipo
MATERIAL	Aluminum
MOUNTING METHOD	Clamp with Security Screw
RUNTIME (BATTERY)	6 Months
BATTERY CASE DIMENSIONS (L/W/D)	4" x 2.5" x 0.6"
BATTERY CASE IP RATING	IP68
