Additional information:

Let paint dry at least 24 hours. Then Place wine glasses on a cookie sheet and place in oven, middle rack. Close oven door, set oven temperature to 350 degrees. Allow oven to come to temperature then set oven timer for 20 minutes. Once time has expired, turn oven off and allow oven and glasses to cool. Once glasses are safe to handle remove from oven. I do not recommend cleaning in a dishwasher. Use mild soap and water. ENJOY!

Love and hugs!
