

GRLC Plate Carrier

The United Shield International GRLC Plate Carrier was developed to give the end user an Ultra Lightweight carrier option that offers front, back and cummerbund armor. This carrier was developed based off our end user feedback and today's critical mission needs. With our unique "Y" internal vent system for cooling along with our high-performance cooling mesh in-conjunction with Body armor vent, the GRLC offers a cooler temperature vest. The vest comes standard with dual Mantis Buckles, laser cut cummerbund with 1 internal pocket and internal laser cut MOLLE for the addition of side plate pockets. The GRLC also utilizes our G-hook attachment system in the rear of the carrier to provide extra flexibility in sizing.

FEATURES:
