

# Incentivized Commercial EV Charging

WISE EV is now offering turnkey EV charging site development and operations for businesses including access to rebates and incentives covering up to 100 percent of the capital investment.

# WISE EV offers EV Charging as a Service

## American Made

WISE EV proudly features American-made Siemens EV charging equipment delivering fast, efficient, reliable charging services. Featuring dual-port, 300kW ultrafast chargers, the WISE EV solution is a user-friendly experience that intelligently distributes power to vehicles to effectively manage demand. On site power storage ensures the most cost-effective and reliable access to electricity.

## Incentives and Rebates

Numerous state, federal, and local incentives are available to make the installation of EV Charging equipment extremely affordable -- many site hosts will receive zero-cost equipment and installation.

WISE EV can navigate the process to help site hosts identify and access the funding available through public grant programs.

## Turnkey Profitability

Site hosts not only enjoy turnkey installation and operation of their EV charging offering, but they also enjoy the WISE EV profit-sharing business model.

In addition, the WISE mobile application serves special offers, promotional messaging, and loyalty programming to drive incremental sales from customers engaged in EV charging on the property.

# SIEMENS

## The WISE EV Difference

WISE EV has established its EV Charging as a Service offering to meet the growing need for EV charger access in communities across the country.

As a forward-looking charge point operator, WISE EV provides site hosts with a turnkey service to provide customers, guests, and employees with cost-effective EV charging that in turn creates a new revenue stream.

The WISE en route mobile application provides users with directions and availability information along with custom offers, messaging, and loyalty programming.

Site hosts enjoy peace of mind knowing that the WISE EV maintenance and support team stands at the ready to deliver support services while ensuring a seamless charging experience.

Backed by world-class technology, WISE EV's Charging as a Service aims to set the standard in robust, networked, and profitable solutions for businesses looking to engage in the future of the electric vehicle infrastructure.
