

Collaboration & Mobility

InfinityOne

Exceptional Innovation

Work Better Together

WebRTC Voice, Presence and Status indications for effective collaboration.

IM & Public / Private channels stored securely on your server.

Click to Call for fast voice communication.

Every feature anywhere you go for complete mobility.

InfinityOne

COLLABORATION ANYWHERE

Leverage the power of your office

Work smarter and better together by combining powerful Presence, Instant Messaging / Chat, and Mobility.

See - The status of your co-workers. Who is in the office, who's away. Who is available for voice calls, IM or Chat.

Share - Files, images, etc. with co-workers in private direct messages or public / private groups.

Chat - Directly with private Instant Messages or in public / private channels.

Talk - To anyone from anywhere using the integrated, fully featured WebRTC client, or use your deskphone integrated with Infinity One Click to Dial or standalone.

PRESENCE

Collaborate effectively by knowing the status of everyone you work with. Simple color indicators let you know who is online, busy, on a call, or away.

GROUP CHAT

Chat securely in a group and privately with an individual, with file uploads, @mentions, slash commands, emoji, and customizable roles and permissions included.

CHAT CHANNELS

Create unlimited chat channels. And unlike commercial services all of your content is stored privately and securely on your own server. Link easily with popular hashtags.

WebRTC CLIENT

Connect from anywhere you go with full PBX features using our powerful browser based mobility client.

@MENTIONS

Respond effectively with @mentions and audible and badge notifications
