

Project Interactive White Board

I am sure that you can all remember the black chalkboards in your school classrooms. When I first started teaching that is what was available. The chalk residue would settle on the tray, in the room, and on me! Every Friday the erasers were taken outside to be clapped together. What a mess!

Chalkboards were then replaced with white boards and markers and these have served teachers and students well for many years.

However, in this age of technology a simple white board can be updated to an interactive white board with some digital tools. This is the Mileage Club project that has been chosen for the 2018-2019 school year.

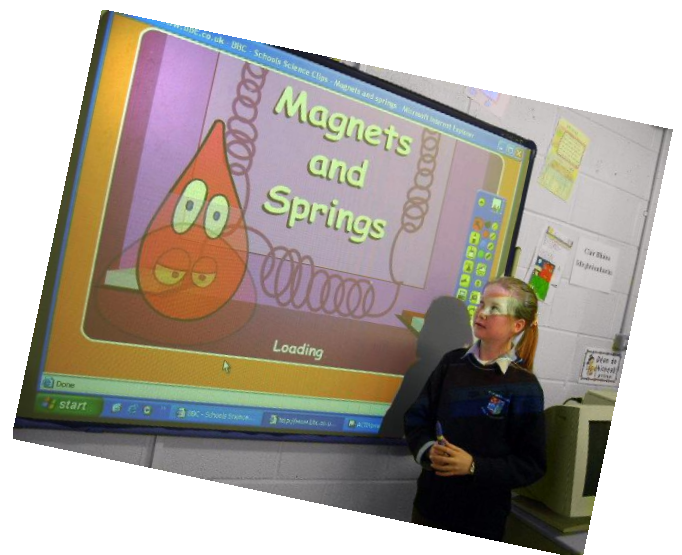

For under \$200 per room, a wireless interactive whiteboard system can be purchased to facilitate digital learning. As a present estimate, BTCS would need 10 of these systems. In addition, there are currently four rooms without a projector at a cost of about \$800 per room.

For a little over \$5,000 we could update every classroom with the technology needed for interactive white boards.

I am so very excited about this project! I hope you are, too. The students would benefit greatly from this up-to-date learning tool. Please consider sponsoring a child and make this a reality for all of them.

Sincerely,

Ann Newton

MILEAGE CLUB SPONSOR PLEDGE

I'm a proud Mileage Club Sponsor for _____ at
Burge Terrace Christian School for the 2018-2019 school year.

I promise to provide the incentive of _____ per mile that he/she
completes. I understand that the school will send me a letter at the end of
each semester to certify the number of miles that my student ran/walked.

A charitable donation receipt will also be provided when my check is
received.
