

Defending our next Battlefield in **Cybersecurity**

ABOUT US

H2L Solutions, Inc. is a HUBZone and service-disabled, veteran-owned small business providing cybersecurity and information assurance services and support. Based in Huntsville, Alabama, H2L serves clients nationwide and has supported a number of Government agencies through the RMF accreditation and DFARS compliance processes.

PENETRATION TESTING

Evaluates the effectiveness of system security through external and/or internal authorized simulated cyberattacks.

RISK MANAGEMENT FRAMEWORK

Guides through categorization, migrating from DIACAP to RMF, implementing and preparing for an ATO.

CATEGORIZATION GUIDANCE & SSP DEVELOPMENT

Classify information systems and the data they handle based on their sensitivity and criticality to the organization.

RISK ASSESSMENTS & SAR

Identify, analyze, and evaluate potential risks to an organization's digital assets, including sensitive data, IT systems, networks, and applications.

POA&MS & SAP DOCUMENTS

Ensures proper procedures and best practices while remaining compliant, efficient, and consistent within the organization's various aspects of operations.

ISCM STRATEGY

Continuous monitoring and improvement to allow the protection of information assets and mitigate risks effectively.

EMASS NAVIGATION & STIG SUPPORT

Supports automated checks, configuration templates, and guidance on implementing STIG-compliant configurations.

IMPLEMENTATION PLAN & SECURITY CONTROLS

Develop strategies structuring the approach to deploy and operationalize security measures within an organization.

H2L
SOLUTIONS

H2L consistently improves the cybersecurity posture of our DoD customers and know how to take failing systems to full compliance. We have taken multiple IT & C4ISR systems integrated onto ground systems through the entire ATO process and maintain hundreds of systems' current ATO Certifications.
