CLOUD ENABLEMENT

Our Cloud Enablement Framework (CEF) and related services helps tackle the difficult challenge of adopting, managing, and realizing the benefits of Cloud.

- Cloud Migration Strategy & Execution
- Cloud Engineering
- Operational Support
- Hybrid Cloud Deployment
- Cloud Architecture & Scalability
- Application Re-factoring

AGILE

Integrated transformation services from advisory to execution to help you navigate the Agile and DevOps lifecycle.

- Agile & DevSecOps Software Development
- DevSecOps Strategy & Enablement
- DevOps & Agile Coaching
- Agile Transformation Training

DIGITAL

Helping organizations build a modernized, customer-centric digital ecosystem.

- SaaS & PaaS Implementation
- Data Management, Analytics and Visualization
- Legacy Application Migration
- Machine Learning and IoT
- IT Strategic Planning

CYBERSECURITY

Grounded on widely-accepted risk management best practices, our resilient Cybersecurity services provide the operational blueprint for maturing cybersecurity activities.

- Information Assurance & DevSecOps
- Threat & Risk Enumeration
- Assessment Services
- Cloud Security
- Vulnerability Management
- Identity and Access Management (IAM)

AIR TRAFFIC

Strategic, technical, and operational capabilities to support modernization of National Airspace System (NAS) systems and procedures, advance aviation safety and realize NextGen evolution.

- Systems Engineering
- Safety Engineering & Safety Risk Management (SRM)
- Air Traffic Controller Training
- Simulation/Laboratory Training
- Aircraft Equipage & Avionics

ABOUT US

We innovate and deliver. We enable IT modernization by harnessing the power of Cloud Infrastructure, Next-Gen DevSecOps and Digital Technologies to create Agile, secure and efficient enterprises. We adhere to best practices such as Agile Scrum, Continuous Integration/Delivery and User-centric design to quickly deliver interoperable, configurable and scalable solutions. Rather than simply implementing IT solutions, we combine it with leading digital creativity and deep industry knowledge that enable organizations to better achieve their mission objectives and critical national security imperatives. We believe in our clients' missions and understand the challenges they face in serving the American people.

Questions? More Information? Please contact Mark Landis | Business Development | mlandis@indev.com

Who We Support

Indev proudly provides industry leading expertise and solutions across the Federal marketplace, including the Federal Aviation Administration, Department of Transportation, Homeland Security, Treasury, Defense, and the GSA.

Who We Serve: ICE OCIO, Solutions Delivery Division

Services We Provide: Indev provides Agile & DevOps Transformation services (Assessments/Training/Coaching) and Release Support to the Solutions Delivery Division to help drive Agile adoption, maturity, and culture change. Our services include development of a comprehensive ICE Agile/DevOps Playbook and associated processes, assessments, templates, and lessons learned. We provide Agile training using our Agile Curriculum offering that includes 15+ courses. We provide Release Support, software development and technology architecture expertise for 20+ ICE projects. Our efforts are key in progressing ICE's transformation to Agile & DevOps adoption.

Who We Serve: TSA OCIO, SecureFlight Program

Services We Provide: Indev provides Agile & DevOps Transformation services (Assessments/Training/Coaching) using SAFe framework to the Secure Flight modernization project. This includes embedded coaching, training, and assessments for multiple dev teams across the Program, helping transform the Program's culture and implementation Release Trains and progressing the Program's transformation to SAFe.

Who We Serve: TSA, Hiring & Recruiting- HR-IT Program

Services We Provide: Indev provides Agile SDLC, Azure Cloud, & Salesforce Lightning (Admin/Config/Development) services to the HR-IT program that manages all marketing recruiting and hiring for all TSA personnel agency-wide—including ISSOs, Federal Air Marshals, Administrators, and Technical staff. We currently support an enterprise Salesforce implementation and cloud migration by providing software application development, configuration, and cloud engineering services for an HR modernization effort, which will enhance the TSA's ability to track applicants and assets, and more efficiently manage workflows.

Who We Serve: GSA, Fleet Program Modernization

Services We Provide: Indev provides Agile & DevOps Transformation services (Assessments/Training/Coaching) using SAFe framework to Fleet Program Office. Our support and expertise that we provide includes coaching, training, and program management and oversight support services to assist GSA Fleet with the development and modernization of their 19 legacy applications. Indev uses our Agile Implementation Framework to provide hands on coaching, training, and maturity assessment and recommendations to assist GSA Fleet with implementing the processes, practices, procedures and philosophies to create a successful Agile Systems development environment and culture.

Who We Serve: USAF Lifecycle Management Center, Aerospace Management Division, Air Traffic Systems Branch (AFLCMC/HBAG)

Services We Provide: Indev supports documentation for air traffic automation system (STARS) and terminal radar (DASR) connections and configuration for 44 USAF worldwide deployed sites. Indev collaborates with the USAF Air Traffic Control and Landing Systems (ATCALs) community, including the Air Force Flight Standards Agency (AFFSA), the Air Traffic Systems program office at Hanscom Air Force Base (HAFB), and deployed sites to provide a comprehensive picture of the range of deployed radar-automation configurations. Indev also collaborates to characterize STARS and DASR connections to USAF information security requirements and recommends solutions.

Who We Serve: Federal Aviation Administration (FAA)

Services We Provide: Indev provides the Controller Training Contract (CTC) stakeholders with Air Traffic Control Training, Simulation/Laboratory Training, Development and Maintenance, Program Support, and Training Process Improvement. The FAA employs more than 14,000 air traffic controllers in air traffic facilities of varying sizes, safely separating more than 50,000 aircraft in the National Airspace System each day. To provide such air traffic services, Indev trains new air traffic control specialists and provides recurrent training to current air traffic control specialists across the FAA's Western Service Center.

Who We Serve: FAA, William J Hughes Technical Center

Services We Provide: Indev provides Agile Transformation (Assessments/Training/Coaching) services using the SAFe framework to AJW-175, Remote Maintenance Engineering Sensor Team (RMEST) and its critical projects. This includes maturity assessments, training, and embedded coaching for multiple dev teams and driving culture change across the organization and supporting leadership goals of driving Agile maturity.

Who We Serve: DOT, Pipeline and Hazardous Materials Administration (PHMSA)

Services We Provide: Indev provides a wide array of services to PHMSA for the Pipeline Asset Manager (PAM), Pipeline Inspection and Enforcement (PIE) projects. Our services include including direct support to the CIO in the areas of Information Assurance, Continuous Monitoring, & Cybersecurity; PMO, EA/ CPIC, Requirements Analysis, and Acquisition Support with IT modernization related efforts. We provide analysis of existing and future business processes, system requirements, and IT Asset Management.

Who We Serve: DOT, Federal Railroad Administration (FRA)

Services We Provide: Indev provides the FRA CIO with a wide array of services including Microsoft Dynamics 365 implementation, Enterprise Architecture, Data Management Strategy, Data Integration, and IT Modernization Planning. Indev is implementing two projects with Dynamics 365 to support railroad enforcement and project management tracking for grants. We also provided an authoritative assessment of FRA's current IT and data management capabilities, identifying performance gaps between current systems and the to-be architecture, resulting in the modernization of IT assets and improved operational efficiency.

Who We Serve: Treasury, Office of the Special Inspector General for the Troubled Asset Relief Program (SIGTARP)

Services We Provide: Indev provides the SIGTARP CIO with technical support and program management Services to support its federal law enforcement mission of targeting financial crimes. We provide program and project management, case management, O&M, SharePoint development/administration, internal and external website development /administration, cloud enablement, data management and integration, interface development and support, engineering, and business intelligence and mission analytics. Indev's solutions and support have led directly a 31-x return on investment. Our tailored implementation of Indev's Agile Methodology led to us obtaining our corporate CMMI DEV L3 appraisal.
