Interstate, Highway, Street Light and Parking Lot Fixtures

ARRLUX combines in-house engineering and the long history of designing and manufacturing state-of-the-art roadway fixtures with a long term proven track record in the industry. These innovative standards have changed the way we illuminate our highways and byways.

The ARRLUX solution in roadway products offers the widest selection of fixtures with designs unequalled, combined with the largest selection of optics and photometric options that meet and exceed all requirements set forth in the roadway markets that consist of residential, municipal, major highways and interchanges.

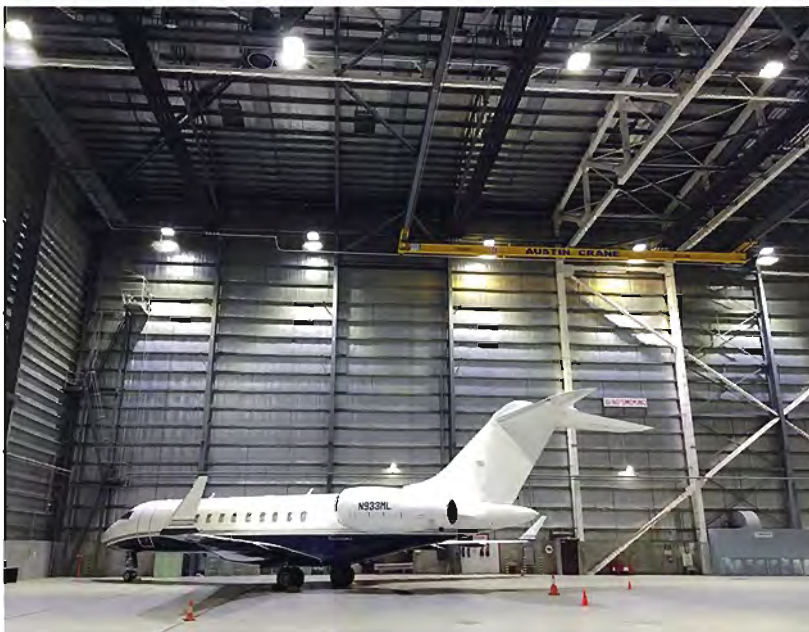

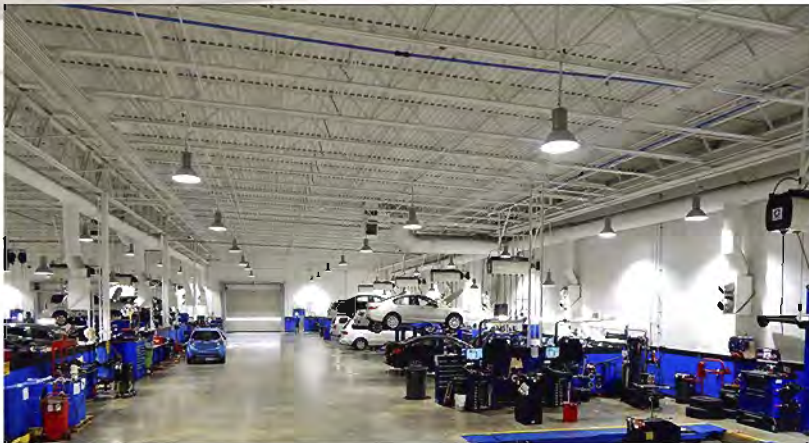

ARRLUX street lighting products are also available with wireless controls designed and engineered that in turn offers the option for remote operation and the ability to monitor and control all the fixtures installed on the network.

Indoor Industrial and Specialty Fixtures

ARRLUX commercial and industrial luminaries feature Industry-class leading efficacy and efficiency combined with a contemporary flexible modular design. In addition ARRLUX industrial products set the standard in the industry by bringing all the benefits of ARRLUX designs and engineering in high and low bay applications as well as area lighting wall-packs that can accommodate any building height.

ARRLUX industrial luminaries feature innovative thermal management and the widest range of fixture optics. The contemporary design, custom housing colors and options will provide an upgrade compared to the “run-of-the mill” products available in the market. As in all product lines, ARRLUX products utilize premium LED chips, drivers, components and a comprehensive 10 year warranty including the Philips drivers.

Stadium, Sports-Field and Court-Lighting Fixtures

ARRLUX is the industry leader in sports lighting with their modular and scalable fixture lines. Regardless of pole height or placements, ARRLUX is able to meet broadcast media lighting requirements, professional, collegiate, high school and USTA lighting standards.

With over 20 optical distributions and modular lumen flexibility, ARRLUX can meet any uniformity requirements. Every option for sports lighting is covered with remote driver systems, DALI compatible for use with all state-of-the-art control systems.

All certifications and DLC Premium listings for sports lighting fixtures, 200,000 hour lifespan and a 10 year warranty including Philips drivers make this fixture the standard leader in the sports lighting industry.
