Get clarity on career in Medical Dermatology, Advance Cosmetology, Aesthetics, and Trichology across India, with personalized guidance for both medico and non-medico aspirants to build a successful practice or secure the best job opportunities.

SAMPLE CERTIFICATE

At IOCA Pune, cautery is a preferred method for safe and effective skin tag removal. It works by precisely destroying the tag while sealing blood vessels, leaving little to no bleeding. Under expert supervision, students are trained with strict safety measures—sterile instruments, correct power settings, and skin protection—ensuring smooth healing and excellent cosmetic results.

ELIGIBILITY TEST CALL : 9422870875

At IOCA Pune, students can get their certificate verified under course eligibility by paying 1k a minimum advance amount. This helps in selecting the most suitable course—whether in Cosmetology, Laser, Trichology, or Medical Dermatology—ensuring the right match before proceeding with full enrollment.

ADVANCE COSMETOLOGY *Get Certified*

Bachelor Medico & Non-Medico Degree Holders

Two programs are uniquely designed to provide in-depth training in modern aesthetic practices. While the Certificate in Advanced Cosmetology focuses on essential techniques and treatments, the Post Graduate Diploma in Advanced Cosmetology offers a more comprehensive curriculum, covering advanced procedures such as HIFU for skin lifting and tightening, cutting-edge anti-ageing solutions, and cryoslim fat-freezing technology that supports lymphatic drainage for effective inch-loss and body contouring. These courses equip graduates with the latest clinical skills and hands-on expertise to excel in the ever-evolving cosmetology industry.

CURRICULUM

The PG Diploma courses at IOCA Pune cover a complete curriculum in Clinical and Advanced Cosmetology, including skin anatomy, dermatological disorders, acne and pigmentation management, chemical peels, mesotherapy, botulinum toxin, dermal fillers, PRP, microdermabrasion, microneedling, hair and scalp treatments, and advanced anti-aging protocols with hands-on training on US-FDA approved lasers and devices.

Students are trained extensively in lasers and energy-based devices, including hair reduction, pigmentation, tattoo removal, scar revision, skin rejuvenation, and body contouring. Courses also cover chemical peels, mesotherapy, PRP, microdermabrasion, and the latest regenerative techniques to give real-world exposure with US-FDA approved technologies.

HIFU SET UP AT THE IOCA PUNE CENTER

The advanced modules highlight clinical dermatology and trichology, addressing acne, pigmentation disorders, hair and scalp diseases, alopecia management, and anti-aging medicine. Learners also gain insights into aesthetic gynecology, injectables like botulinum toxin and fillers, and advanced skin tightening procedures.

To make professionals industry-ready, the program integrates practice management and patient handling skills, medico-legal aspects, and entrepreneurship guidance. With case-based discussions and live demonstrations, IOCA ensures every graduate is fully equipped to lead in the fields of cosmetology, dermatology, and aesthetics.
