## Advertisement

The Green River/Rock Springs/Sweetwater County-Joint Powers Water Board (JPWB) is accepting applications for an **Engineer**. This full-time, FLSA exempt, fully benefited position is located at the Water Treatment Plant (WTP) in Green River, Wyoming. The position is responsible for (but not limited to) all planning, engineering, and project management on JPWB facilities. Candidates must possess an “Engineer in Training” Certificate (EIT) with a Bachelor of Science in Engineering or be a licensed Professional Engineer (Civil-*preferred* or Mechanical). The JPWB offers an excellent benefit package including full participation in the Wyoming Retirement System and Health Insurance. Salary range for an EIT is \$80,000 - \$90,000 and for a PE the range is \$90,000 - \$105,000 (annually), with starting salary to be commensurate with experience and qualifications. Application information can be obtained by contacting the JPWB at (307)875-4317 x 222 or at [jpwb.org/notices](http://jpwb.org/notices)

## Supplemental Information

### Description

The Green River/Rock Springs/Sweetwater County-Joint Powers Water Board (JPWB) is the regional purveyor of potable water, supplying nearly 40,000 citizens in and around the Cities of Green River and Rock Springs, Wyoming. The JPWB owns and operates a 32 MGD surface water treatment plant delivering water to two Cities, four Districts and an industrial customer. The transmission and distribution system in these communities is owned by the JPWB but operated by the respective entity.

### Position

The purpose of this position is to provide engineering and project management for all JPWB owned facilities. This may involve initial planning, budgeting, funding, managing consultants, permitting, coordination with state agencies/funding partners, obtaining necessary permits and easements, directing contractors and all other aspects of a capital improvement project.

The position must coordinate, prepare permit applications, review construction plans, drawings, calculations, specifications, and reports. The position may also conduct research on regulations, standards, and historical data. On projects involving the Water Treatment Plant; the engineer must review, evaluate, and coordinate all asset improvements with Maintenance and Operations Divisions. Additional duties may include preparing budget items for capital improvement projects and O & M budgets. On capital construction projects, the engineer may be responsible for overseeing the work of consultants in developing and administering: bid documents and addenda, construction plans and specifications for projects, responding to Requests for Information, developing work directives, evaluating/negotiating/preparing change orders, and the closing out of projects. Routinely the engineer will be visiting sites/facilities, utilize hydraulic model software and interpreting model results for use on capital improvements or private developments. Other duties include developing and implementing master plan(s) for the water systems, as well as reviewing private development master plans, construction plans, and hydraulic calculations including evaluating the impact of private development on existing infrastructure. The engineer may be attending conferences, seminars, emergency training and response, and on occasion may be conducting meetings and/or communicating with the public.

### Benefit Package Summary \*

The JPWB offers an excellent benefit package. The JPWB participates in the Wyoming Retirement System (WRS). The WRS system is a defined pension plan managed by the State of Wyoming. Currently, the JPWB contributes both the employer's contribution as well as the

employee's contribution (these contributions currently total 18.62% of the salary). In addition, employees may elect to utilize the WRS 457 Deferred Compensation Plan (the JPWB contributes \$10/pay period to encourage enrollment). More information on these plans can be found at, <https://retirement.state.wy.us> .

Additionally, the JPWB currently provides full Health Insurance coverage for the employee, spouse and dependents. The JPWB currently pays the monthly premiums as well as contributing to the employee's HSA account.

The JPWB currently observes seven paid holidays and provides four additional floating holidays. Additionally, the JPWB provides paid vacation and sick leave pursuant to the current Employee Reference Guide and applicable amendments.

*\* The employee benefit package is made of several components, some of which are not under the control of the JPWB, therefore the specifics of the benefit can change over time. The JPWB annually reviews employee costs and the statements above are not a guarantee of future benefits, contributions or enrollment in specific plans.*
