

# n2Engagement, Inc.

*Providing Sustainable Public Involvement Solutions*

**Virtual Office Associates, LLC (dba n2E, Inc.)** a firm Chartered in the State of Maryland, was established to provide sustainable public involvement strategies that support non-profit and public sector planning. Helping our clients meet federal environmental justice rules in response to Executive Order 12898 became our signature product in 2005. In 2013 the firm moved to Florida and changed the name but the **VOA/n2E** brand is the same. Increasing engagement using communication technology, strategic management, and cultural competence is a small measure of our capacity to involve citizens who before, were the least likely to participate.

Our mission is to cultivate the concept of environmental justice in urban planning. In so doing, we utilize a circular flow of resources to achieve sustainable civic involvement. We ensure the interpretation and enforcement of programs and policies are understood by all and undertaken in a consistent manner whether in print, on social media, or whatever the mode of communication.

Our experience developing knowledge transfer strategies span three decades. We are committed to sustainable development designed to educate disadvantaged and low-income stakeholders, improve legislative and regulatory responses to minority priorities, and enhance public conversations about social issues concerning all citizens regardless of difference.

In the Washington, DC metro region, VOA successfully provided communications support to implement human capital asset mapping and community visioning on waterfront, land-use, housing, and transportation projects. Utilizing public dispute resolution techniques, we achieved transparency, honesty, and community participation on the \$25m 11<sup>th</sup> Street Bridge Rebuild \* Multi-million Dollar Anacostia Waterfront Initiative and Transportation Master Plan \* DC Comprehensive Plan \* DC Parks and Recreation Master Plan \* Cambridge Lives! [Main Streets America, Cambridge, MD] Community Visioning Plan, and other multi-agency community redevelopment projects. All sectors of the public regardless of race, ethnicity, age, location or literacy level have been facilitated by our methods. To the satisfaction of stakeholders, measurable outcomes have been delivered in simple and complex planning processes that are now national models.

Whether a public meeting, workshop, Town Hall, or other community event, n2E can provide the tools necessary to bridge gaps between agencies working to improve quality of life and the constituents who deserve to be active participants of the process.

n2E are communication and civic engagement specialist. We are ready to design your public meeting or event, rebrand your project or mission, and make your product the one people will be talking about!

Our process guarantees:

- Grand strategic planning of sustainable public engagement
- Marketing and outreach to all literacy levels
- Communication with agency officials and key stakeholders
- Locally-targeted set of how-to rules of engagement
