There are a number of important roles and responsibilities with your Estate Plan, it is important to understand each of the roles so you can select the right person for the right job. If you are already familiar with them feel free to skip ahead to the next tab.

Trustee: The Trustee of your Trust controls and manages the trust for the benefit of the Trust Beneficiaries. He or she can move, sell, buy, and dispose of assets. Initially you and your spouse serve as Trustees.

Successor Trustee: This role is very important with significant responsibilities. After your death, the Successor Trustee has responsibility for management of your Trust. At this point your trust becomes irrevocable; the Successor Trustee must follow the the directives your have provided to administer your estate, pay debts, and distribute assets. If distributions are held until heirs reach a certain age or conditions, the Successor Trustee is responsible for managing investments and paying ongoing expenses.

Health Care Agent: The Durable Power of Attorney for Health Care gives this person responsibility for literally making life and death decisions about your healthcare. Health care agents have complete authority to make decisions regarding medical treatment if you are incapacitated. Choose carefully since this person can withdrawl life support even in non-life threatening situations. This person MUST be an adult, minor children do not have the authority to make these decisions. Religious considerations are a factor, since you want to make sure this person will follow through with your life support directives.

Financial Agent: The Durable Power of Attorney for Finances will give your agent the power to make basic financial decisions regarding assets NOT FUNDED into your Trust. (For assets already funded into the Trust, the Trustee already has this authority.) This power is effective either upon the date of execution of the document or upon your incapacitation depending on the selection you make. Please make this selection carefully as your agent may use this power to buy and sell non-trust assets, write checks from your (non-trust) accounts etc... He or she could even fund assets into your Trust prior to your death to avoid probate.

Guardian: This is the person who you select to take custody and responsibility for any dependent children in the event of your death or incapacitation.

People & Organizations

In this section you should add the names and information on each person or organization that will play a role in your Estate Plan. Anyone who may be a trustee, beneficiary, agent, guardian, or any other role needs to be listed here. Organizations or Entities should also be listed here (for example if you want to give a bequest to your church.)

One person can have multiple roles, such as healthcare agent and also your guardian for your kids as well as being a beneficiary. Do not worry about selecting those roles right now, you will do that in a little bit. If you forget someone, do not worry you can come back and add them to your list.
