

Press Release

Human Umbilical Cord Blood Stem Cells are Back here in the USA

Yes, several states have passed legislation that allows Human Umbilical Cord Blood Stem Cells (HUCB) treatments. Currently, as you may know, Physicians have the right to treat their patients, and the patient has the right to be treated once comprehensive releases have been agreed to and signed by the patient and the responsible physician.

We are pleased to announce that a USA registered laboratory is releasing for national consumption their inventory of Human Umbilical Cord Blood Stem Cells vials. These are fully documented vials tested, registered and sourced from qualified US donors. They are cryogenically stored and ready for immediate delivery under the strictest shipping protocols.

💰 **Financial Reasons to Offer Cord Blood Stem Cells in Your Practice**

- **High Patient Demand = Revenue Growth**
 - Regenerative medicine is one of the fastest-growing healthcare sectors, projected to exceed **\$40 billion by 2030**.
 - Patients are actively seeking alternatives to surgery, steroids, and pain medications.
 - Clinics offering stem cell therapies can **attract new patients** who are willing to pay cash for innovative treatments.
- **Cash-Pay Model (Out-of-Pocket Revenue)**
 - Most stem cell therapies are elective and not covered by insurance.
 - This means **upfront cash payments** with no billing delays, coding denials, or insurance paperwork.
 - Typical treatments range from **\$3,000 to \$10,000 per procedure**, depending on indication and geography.

We look forward to working with you to better understand the current environment as it pertains to this tremendous biological treatment. We are available to assist you and your patients with their medical needs.
