

# Quick Start Guide for Infected:

So you've looked at everything in the box and have no idea how to start, where to begin, or even what a good first step might be. Maybe this is your first box and you aren't sure how things work. Or maybe things just aren't clicking for you on this particular box. Maybe a few starting hints will blow the case wide open and will be all you need to help solve the mystery.

Beginning the investigation:

The first objective in Infected is to figure out which cell corresponds to which missing person. Use the diagram Clayton Wilbanks drew in his notes. Read through everything he wrote and through the detective notes scribbled on the back of the Periodic Table. Several of the missing persons can be placed into the correct cell by simple reading and deduction.

Here are some other things that can be used together to place other missing persons into the correct cells:

1. Breaking News Card, Map, 911 transcription, Wreck Card
2. Red letters on the wall, photograph of chemical jugs, hash marks photograph, safe
3. Try emailing the Valley Falls Missing Persons Hotline

This should give you a good start on the box. Still stuck after completing all of this? Try our hint file, join our hint group on Facebook, or send us a message and ask for help.
