

Joy School English for Newcomers

Upper Elementary

NEW! Specifically built for newcomers.

Joy School English is excited to introduce a brand-new course specifically designed for **older elementary newcomers**. These students benefit from the rigorous and **age-appropriate opportunities** found in the Joy School English curriculum, which includes:

- **strong oral language development,**
- **English language acquisition**
- **emergent reading skills**
- **speech recognition technology**
- **social-emotional learning**

- **Accelerate speaking confidence for newcomers**
- **Get newcomers reading English faster**
- **CASEL-aligned social-emotional learning**

Accelerate speaking confidence

Students in the older newcomer course learn content at a quicker pace than students in lower grades. Carefully curated games, books, videos, and music sustain engagement by appealing to an older elementary audience. And a higher concentration of speaking opportunities will have your students talking even more, and getting feedback from our speech recognition engine.

Reading English faster

Students learn or review basic literacy skills sufficiently but briefly and then quickly move on to higher-level literacy skills like sight words, decoding, digraphs, spelling, and reading sentences.

Social-emotional learning

A values-rich curriculum incorporates social and emotional learning that builds strong character.
