

Hiroki Toma

I am formally submitting my bio to be considered for the position of Member at Large for M.O.A.

I, Hiroki Toma, was a former Senior Stationary Engineer/Deputy Superintendent for NYC Water Treatment Plant, where I coordinated facility safety, purchasing, maintenance and operation.

I have successfully operated and maintained various treatment facilities for 28 years. I coordinated numerous multimillion-dollar contracts with major construction companies and engineering firms, scheduled shifts for 140 personnel and performed other duties as required.

I also served in the United States Navy in the Engineering Department. My duties included repairing boats, landing crafts and other auxiliary equipment onboard the ships. After my Navy service, I was employed at a 500-slip marina working as a Marine Mechanic where I installed outboards, maintained and repaired marine engines and electronics. I have also operated marine forklifts, 100-ton travel lifts and marina workboats.

I have owned boats since the age of 16 and currently own my 12th boat. As an avid fisherman I am a member in good standing of the St. James Fishing Club. Giving my personal and professional experiences, I believe I have a lot to offer our members. Boating life is and will always be my passion and I am sure I can be an asset to the St. James Marina.

Respectively submitted,

Hiroki Toma
