

A Pioneer Registered Red Angus Herd

Established in 1962

Retirement has brought my wife, Rebecca, and me to beautiful Golden, BC. Our home is located near the base of the Rocky Mountains to the east and the Purcell Mountains to the west, with gorgeous views all around us. Another factor that made the final decision was a picturesque Mountain Lake—now stocked with rainbow trout. I still needed something to do, so we brought with us a small quality herd of Registered Red Angus cattle. These cattle have been carefully selected, replacement heifers have been purchased at Canadian Red Round-Up; our herd bull must meet special criteria to produce the performance that will make a positive difference in your herd as well as in ours.

We are still committed to our bull buyers. Our goal is to raise bulls that will work in any cattle operation. We know you want a bull that will leave good replacement heifers and put pounds on your calves that you sell, that look good either “on the table” or working in the field.

Our love for cattle hasn't changed—

Our love for nature and beauty
hasn't changed---

Our commitment to our customers
hasn't changed.

The Red Angus breed was founded
using performance testing and we have
continued using it, since we started, in
1962.
