CATALOGUE

SPACE BOX MERIT

- ⚙️ Solve the noise and privacy problems in open offices
- ⚙️ Stylish appearance embellishes the office environment
- ⚙️ A variety of matching options to meet individual needs.
Color, furniture, hardware facilities
- ⚙️ Save time, cost and space than setting up an office alone

A dynamic and quiet space that satisfies your unlimited imagination. Non traditional carbon plastic composite plates, aviation aluminum, and sound insulation glass are its main components. SOLIDWORKS software mechanical modeling allows the assembly of the cabin to require only one fastener. The INSUL MARSHALL ACOUSTIC acoustic simulation design accurately predicts and realizes the cabin sound insulation and cabin acoustic environment indicators. It is a powerful, though not the most perfect mini space.
