The historical wisdom of the ancestors has been deposited in solid wood furniture.

BORN GREAT

PRODUCT VALUE

Product value = product design + consumables
 Public dining room furniture = brand value + product value + service experience

Solid wood definitely has its incomparable natural charm and life value!

the
canteen

We draw lessons from the appearance of natural elements to bring users a sense of natural intimacy. We select environmentally friendly fabrics and cooperate with FSC-certified suppliers of rationally harvested wood. While ensuring good quality, we do not forget to protect the natural environment. Responsibility.

DESIGN

SENSE THE WARMTH OF DESIGN

Model: 669Y

Adhering to the goal of creating our own classic products, we also value the durability of our products just like beautiful and comfortable designs. Therefore, the product has high quality requirements. In the design and production stage, in order to polish the product to the most suitable level, frequent testing and adjustment are often carried out to make it meet the international common indicators. At the same time, our products have a five-year quality guarantee and can be used for a long time with confidence.

PERFECT BALANCE

Functionsmith has always been committed to the perfect balance of tradition and innovation

Model: 648Y

We never conceal the many inspirations we have obtained from nature. We are extremely grateful for everything it has taught us and given us. We also want to express our respect and gratitude to nature in our own way and in the language of design.

Model: 857Y

EXCELLENCE

Performed by the master in every detail of the hand-carried object

Model: 763Y

The pursuit of excellence has penetrated into the DNA of Functionsmith Furniture. We not only stop at the dining place or the furniture itself, but also strive to provide a more comfortable dining environment, which is ingeniously integrated with our unique aesthetic values.

NATURAL

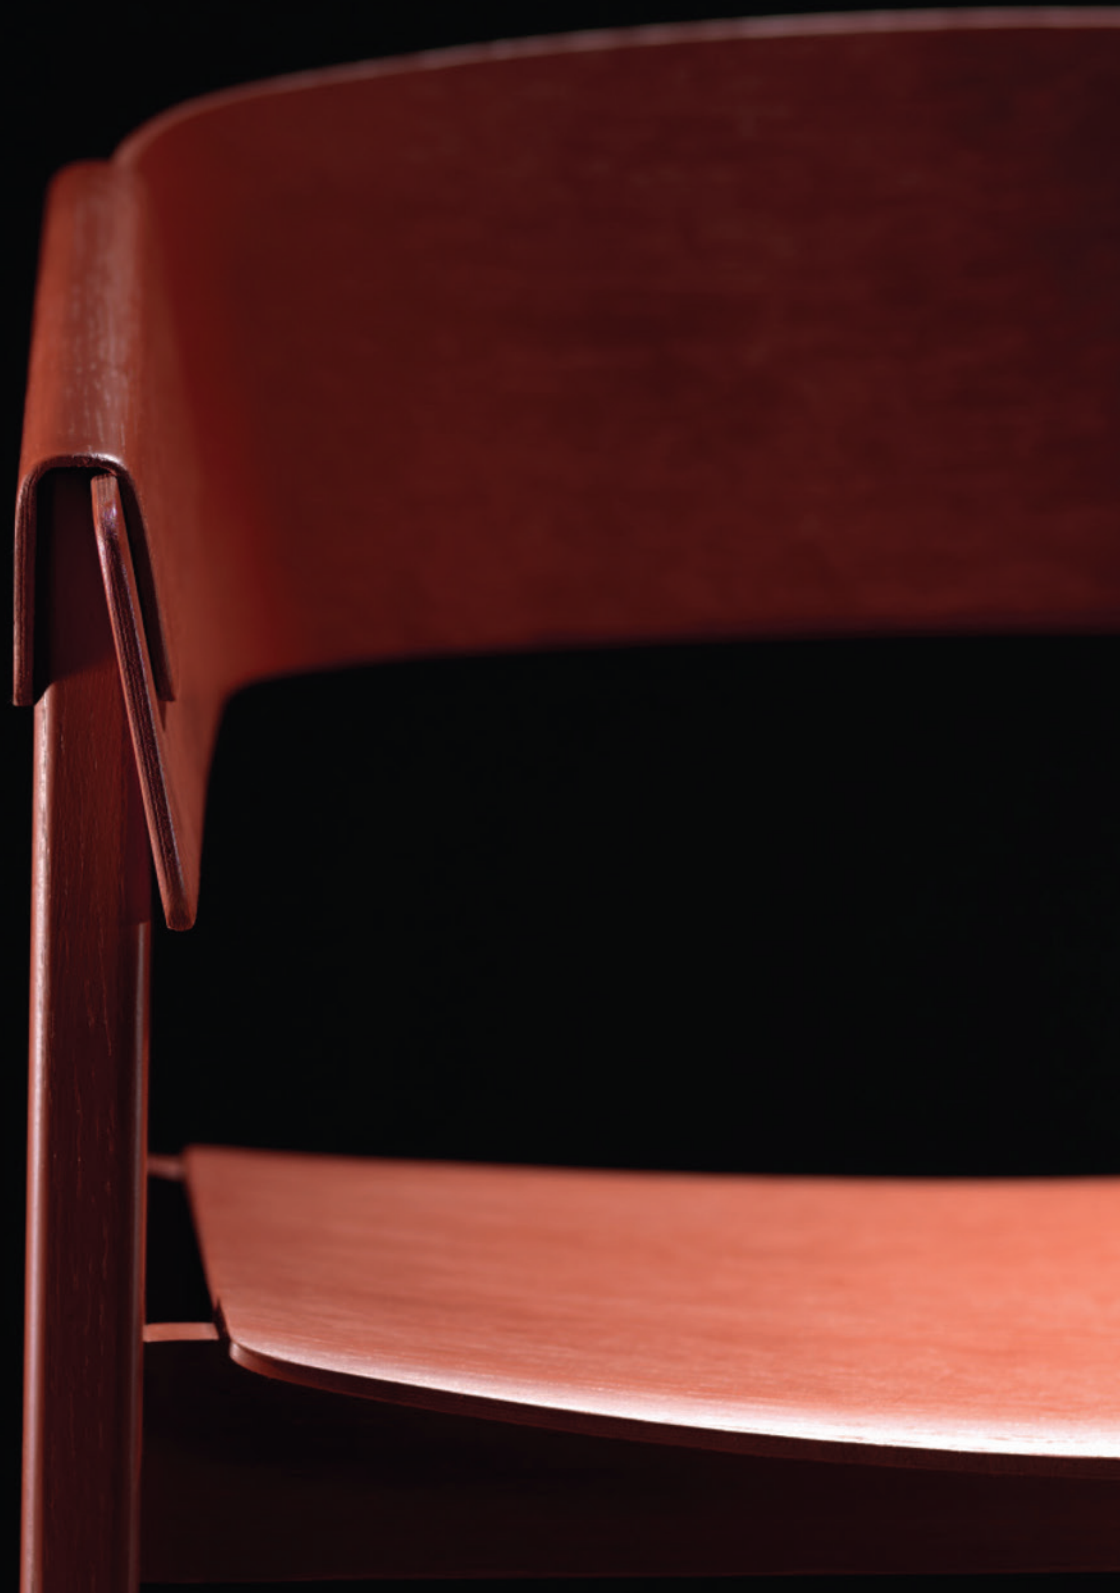

Nature always brings us unlimited insight and inspiration.

We use logs as raw materials, dig deep into the possibilities of processing and the diversity of expression, and now our team is rediscovering the balance of perspective between science and art. Giving users the most origin and natural user experience to improve the quality of the user's daily use. Although these products look simple, concise, and unobtrusive, users touch the edges of plywood during use, they can feel the exquisite manufacturing process and taste the design warmth.

Although these products look simple, concise, and unobtrusive, users touch the edges of plywood during use, they can feel the exquisite manufacturing process and taste the design warmth.

Concise

Model: 18111Y

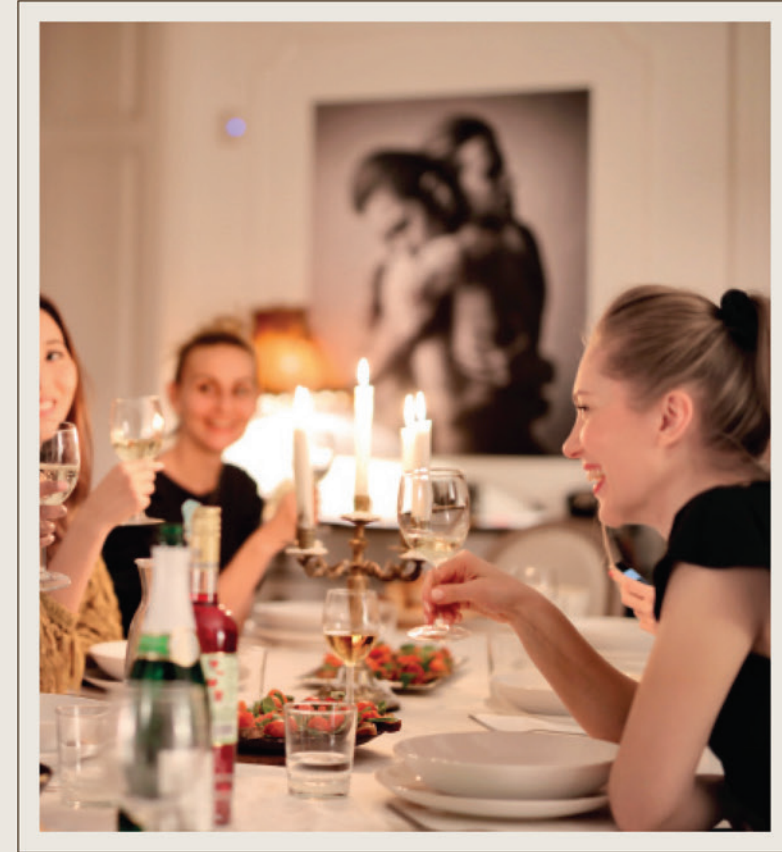

Model: 18111Y -1

Model: 1884Y

Behind every simple and fluent curve is a return to the basics after the collision of hundreds of thousands of human physiological data and fashion aesthetics.

EXTREME
CRAFTSMANSHIP

Is to achieve the ultimate in every detail

Carefully selected

Let every product stand the test of time

As a responsible furniture manufacturer,
I never want to see my finished products,
which will cause any trouble to customers in the long-term use.
To this end,
we strictly abide by the green and environmental protection from the material to the manufacturing process,
use green materials to protect the physical and mental health of users,
and use excellent quality to create a long service life to reduce the consumption of materials and energy.
After all,
environmental protection is not a cold thing. Indicators,
but a highly scientific systematic project.
