

Forklift Certification Program

Guided Pathways Career Services

www.guidedpathwayscareerservices.com

Program Overview

The Guided Pathways Forklift Certification Program prepares participants for safe, OSHA-compliant operation of powered industrial trucks used in warehouse, logistics, and manufacturing environments. This hybrid program combines online self-paced learning, hands-on forklift operation, and professional development to help you gain the technical skills and workplace readiness employers value.

Program Format

Step 1: Online Learning (Self-Paced)

Complete foundational safety and equipment operation modules online at your own pace.

Step 2: Hands-On Forklift Training

Demonstrate your skills through live forklift operation, inspection, and maneuvering practice to earn your OSHA-compliant certification card.

Step 3: Professional Development – 10A Boot Camp (90 Minutes)

Participate in a focused 90-minute workshop dedicated to workplace professionalism, communication, accountability, and career advancement.

■ Includes the 10A Professional Development Boot Camp (90-Minute Workshop on Workplace Excellence)

What You'll Learn

- OSHA safety standards and hazard awareness
- Pre-operation inspection and maintenance
- Proper loading, lifting, and stacking techniques
- Safe maneuvering in confined spaces
- Workplace professionalism and accountability
- Accident prevention and emergency response

Why Choose Guided Pathways?
