

GLORYBOUND LASERTRAIN

Software used:
Avery and Clipart Gallery

- ◆ Black Diamond Slope (hard)
- ◆ Intermediate Slope (medium)
- ◆ Rope Tow (easy)

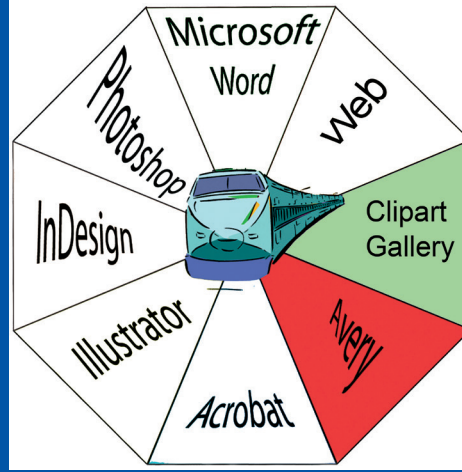

◆ Pattern Set 90: Bar Code Stickers 1" x 2.5/8" (Avery 8160)

Printing on paper 8 1/2 X 11 from Avery. (See bar code sticker for merchandise)

Readying your cover to print

I use Avery software (www.avery.com) or 1800-462-8160 to set up the stickers and a compatible sticker template paper 1" x 2.5/8". The templates with Avery are very good and I have found no need to re-align the printer to fit the patterns on the paper. The template I used goes with the stickers 8160 (Avery), however you can use any 1" x 2.5/8" that specify that they align to the same template. Many stickers put right on the cover

the correlating pattern with Avery.

Set up your Stickers

You can set up your own template #8160 Avery file. White mailing Labels 1” x 2.5/8”, or use the Glory-bound Lasertrain Pattern #90. (I noticed that the pattern is given on the screen at the very bottom.)

Check Template

File>Change Template

- >Format: All Avery Products
- >Portrait
- >Item # 8160
- >OK

Open the Stickers

The sticker opens with a master.

To insert Clip art

>Open the Avery software file

- >To insert Clip art or Photo
- >Click on Photo on the card
- >Click on Picture of Photo (above arrow on

Left)

- >Insert Picture
- >Clip Art Gallery will open if you have loaded it into your hard drive when you installed Avery Software.

- >Otherwise select> Insert
- >Image from file
- >Select Photo> Insert

You use the little handles on the sides of the picture to re size the picture once it is slammed onto the card. You can choose to put it on the Master or individual card.

Make the Bar Code

Open Avery Design Pro

- >Welcome Screen pops up
- >Open existing Project
- (If you have the Pattern 90)
- >Go to Pattern Set 90 and open

or

- >Welcome Screen Pops up

the correlating pattern with Avery.

- >Project from scratch
- >Design Template Screen pops up
 - >8160 (for 1 x 2.5/8 stickers)
 - >Portrait
 - >8160 White Mailing Labels 1x2.5/8 White
- >Ok

Design Pro Help Screen

- >Dismiss the screen (x in Right corner)

Main screen comes up with a label in the center

To make Avery Bar code

- >Go to bar code image on Left side of screen in the palette near the bottom.
- >Click
- >Curser changes from an arrow to a cross
- >Click onto the project
- >Curser changes into a box
- >Type numbers you want for bar code to represent. (No periods or money signs are in a bar code.)
- >Move the curser out of the box
- >Click
- >Change the size of the bar code by hovering over it until the arrow on the curser changes into an x. Then grab the handles of the box and pull the sides of the box to make it the size you want.
- >Save your project and print

See the Print Set of the same number to print the stickers using your specific printer.
