

Tomaseña is the first book of its kind that the entire book is written from dreams and visions received by the author, then interpreted to become a teaching tool for others to hear the voice of God for themselves.

What she points out is that the Spirit has provided an open door to understanding messages which come from heaven by the extension of our faith. Dreams, visions and prophecy provide a bridge to the Kingdom of Heaven bringing guidance, correction, deliverance and encouragement.

The book gives historical credence to dreams and visions, then brings the evidence forward to today demonstrating that it is the Spirit which brings revelation to the individual.
