

NORTHWEST FLORIDA SPECIES GUIDE

PART 2

Get to know your local shells

This guide is designed to provide you with a one-stop source to obtain information on the scientific and visual aspects of the shells found in the Florida Panhandle. The list is not exhaustive as new species are being found quite often. The data contained herein is current as of February, 2026

The list follows the model of the NW Florida Species List, Edition 13, Brant Holman, editor. The 13th Edition can be found on the club's website (<https://gulfcoastshellclub.com>). The first section covered Gastropods. This section will deal with Scaphopoda (Tusk Shells), Polyplacophora (Chitons), Bivalvia (Bivalves) and Cephalopoda (Octopus, etc.). What you do to use this guide is identical to the instructions in Part 1
