Thank You For Your Purchase!

Here are some tips to help you enjoy your new all-in-one Starlink conversion

Network

- The DEFAULT Network Name will be STINKY OR STARLINK with no password.
- Most units get the network name reset during the conversion process, to rename the network either login on your Starlink App or Power Cycle 3 times using the remote On/ OFF/ On/ Off/ On/ Off/ On waiting a second or two between each button press. This will factory reset the network, you will then be prompted to rename and issue a password.
- If you have the ethernet port option, please keep the connection greased with the provided dielectric grease and plug when not in use.

Electrical

- **PAY CLOSE ATTENTION TO THE + AND – POLARITY. WIRING IN REVERSE WILL RUIN THE POWER SUPPLY WHICH IS NOT COVERED UNDER WARRANTY.**
- Hardwire the provided receptacle and wiring harness DIRECTLY to the battery if at all possible **WITH THE PROVIDED 8GA WIRING HARNESS AND FUSE.**
- Once wired you will see the 2 pin connector will plug in then the twist collar will thread in and lock/ seal it.
- For more flexible use, you can find the provided 12v cigarette lighter adapter tip that will also thread onto your Starlink's male plug, there is a replaceable fuse in this tip also.

Snow Melt Mode

- **Turn Snow Melt OFF using the Starlink App.** You must be logged into your associated Starlink account within the app. Just brush it off, it will work MUCH FASTER and not drain your battery or potentially hurt the power supply.

Mounting

- Mount on a roof location that DOES NOT POOL WATER, many RV roofs hold a lot of water near awnings, etc. the unit is sealed up, but not submersible.
- The four corner through holes can be drilled out up to ~.190" to accommodate #10 fasteners, in most cases #8 / M4 fasteners are more than sufficient.
- Preferred mounting with laser engraved end of dish slightly elevated, at an angle, to allow water to run off for best signal.
- If necessary, we offer flexible magnet mounts, suction cups, and thread adapters to 1/4-20 for vehicle roof installation, etc. Please reach out with any questions.
- One of the included remotes is a KEY FOB, the other is a WALL MOUNT.

Hope you enjoy your new and improved hardware!
