

Fort Towson Depot Building exterior scope of work:

West side of building:

Repair and paint fascia

Repair and clean siding

Reattach and paint soffit

Caulk and seal all seams on fascia

Southwest side, upper and lower roof:

Repair and paint fascia

Repair and seal flashing on lower roof

Caulk and seal all fascia

Reattach soffit boards

East side of building, upper and lower roof:

Repair and paint fascia

Replace missing flashing and seal all flashing on both sides

Reattach and paint upper soffit

Repoint crack in mortar joints (east side, upper half)

All siding on the building needs to be cleaned. All flashing and any other point where water may enter the building needs to be sealed. Contractor will keep the work area clean and free of debris. All materials shall be removed by Contractor at the end of the project. All work shall be performed in a craftsman-like manner. Any work outside the scope must be approved by change-order before the work commences. Any additional work without a change order will not be paid.
