DYNAMIC
PRODUCT SOLUTIONS

Specialists In:

- Custom Air Handling
- Precision Cooling
- Humidification
- Dehumidification
- Critical Airflow Control
- Fans/Blowers/Vacuums
- Energy Recovery
- VRF/Mini-Splits

Mechanical HVAC Equipment

Dehumidification for Natatoriums.
Latest Heat Pipe Technology with VFD's on all motors.
Compressor-less Dehumidification in Ranges from
2,000-50,000 CFM.

BUFFALO AIR HANDLING

Fully Custom Air Handlers Designed for any project you
may have. Factory Built and Site Built Solutions.
Superior Engineering, Fabrication, Installation and
Service.

Stulz Precision Environmental Control Units.
Available in Floor mounted, row based, ceiling mounted
and roof-top. Designed to meet the demands of your
critical cooling application. All units are manufactured
in the USA!

NuClimate offers Induction and Chilled Beams with IAQ
drain pans, multiple configurations are available. Our
Valance units are of aluminum construction with fan
assist and drain pan options.

Airflow Control Technologies for Critical Environments.
Customizable Airflow Technologies include award
winning, low pressure-drop AccuValve® airflow
control valve.

Carel offers a full line of humidification solutions with
superior yet simple controls. Gas Fired and Electric
Steam generators, Ultra-Sonic and Atomizing
Humidifiers, and live steam injection.

Desiccant Dehumidifiers for low dew-point humidity
control. Systems from 75 to 30,000 CFM. Rotors
available in 100mm, 200mm, and 400mm depths.

MK Plastics offers the broadest and most complete line
of industrial and commercial corrosion-resistant
blowers and fans. MK specializes in high-plume dilution
fans, fiberglass fans, and acid exhaust systems.

 **THERMOTECH ENTERPRISES**

Most Reliable Energy Recovery Wheel Available.
Thermowheel® Designed for New AHU Applications and Retrofit Applications. Minimum Design Life of 25 years and backed with Standard 10 Year Parts and Labor Warranty.

Highly efficient "Active" heat extraction supports up to 30kW per rack. Adaptable to existing equipment racks, modular design scalable to support heat load. Several design alterations.

Spencer

Spencer blowers range in size from fractional horsepower Vortex® regenerative blowers to 2000 HP multistage centrifugal blowers. Spencer also designs and builds industrially rated vacuum systems for heavy-duty cleaning jobs in commercial, institutional and manufacturing locations.

Hitachi SmartFlex is a full offering in heat-pump technology. VRF Systems from 3 to 36 tons, with available low-ambient high heating performance. Mini-Splits available from ¾ to 4 tons.

BluChill manufactures quality rugged Process Chillers. Their standard offerings include 1 to 60HP sizes with available ultra-low-ambient to -50F. When a standard model doesn't quite fit, they'll build a custom unit to your exact requirements.

Heat Pipe Technology, Inc. is the leader in dehumidification and heat recovery where cross-contamination may be a concern.

Environmentally controlled sterile equipment storage cabinets with integral temperature/humidity and HEPA filtration capabilities to prevent contamination of autoclaved instruments.

Aerovent manufactures a wide range of fans for the industrial, commercial and marine markets. Aerovent has been in business since 1932 and continues to be a leader in the design and fabrication of air moving products.

Aerofin manufactures heating, cooling and heat recovery coils, as well as fluid coolers and remote air-cooled condensers. Specializing in high-quality, industrial duty coils.

Eaton VFD's are the next generation of HVAC drives. The HMAX series patented energy savings algorithm provides up to 10% energy savings out of the box. Available up to 250HP.
