PRODUCT SOLUTIONS

Buffalo Line Card

- Specialists In:**
- Custom Air Handling
 - Precision Cooling
 - Humidification
 - Dehumidification
 - Critical Airflow Control
 - Fans/Blowers/Vacuums
 - Energy Recovery
 - VRF/Mini-Splits
 - Packaged Rooftop Units

EFFICIENT AIR SYSTEMS, INC

Dehumidification for Natatoriums.
Latest Heat Pipe Technology with VFD's on all motors.
Compressor-less Dehumidification in Ranges from 2,000-
50,000 CFM.

Precise by Design

Data Aire is an industry leading manufacturer of precision cooling units and innovative technologies. Precision cooling units with capacities ranging from 1 – 100 tons available in floor, ceiling or wall style units.

Airflow Control Technologies for Critical Environments.
Customizable Airflow Technologies include award winning, low pressure-drop AccuValve® airflow control valve.

MK Plastics offers the broadest and most complete line of industrial and commercial corrosion-resistant blowers and fans. MK specializes in high-plume dilution fans, fiberglass fans, and acid exhaust systems.

Most Reliable Energy Recovery Wheel Available.
Thermowheel® Designed for New AHU Applications and Retrofit Applications. Minimum Design Life of 25 years and backed with Standard 10 Year Parts and Labor Warranty.

BUFFALO AIR HANDLING

Fully Custom Air Handlers Designed for any project you may have. Factory Built and Site Built Solutions. Superior Engineering, Fabrication, Installation and Service.

NuClimate offers Induction and Chilled Beams with IAQ drain pans, multiple configurations are available. Our Valance units are of aluminum construction with fan assist and drain pan options.

Carel offers a full line of humidification solutions with superior yet simple controls. Gas Fired and Electric Steam generators, Ultra-Sonic and Atomizing Humidifiers, and live steam injection.

Desiccant Dehumidifiers for low dew-point humidity control. Systems from 75 to 30,000 CFM. Rotors available in 100mm, 200mm, and 400mm depths.

Aerofin manufactures heating, cooling and heat recovery coils, as well as fluid coolers and remote air-cooled condensers. Specializing in high-quality, industrial duty coils.

Heat Pipe Technology, Inc. is the leader in dehumidification and heat recovery where cross-contamination may be a concern.

Aerovent manufactures a wide range of fans for the industrial, commercial and marine markets. Aerovent has been in business since 1932 and continues to be a leader in the design and fabrication of air moving products.

BluChill manufactures quality rugged Process Chillers. Their standard offerings include 1 to 60HP sizes with available ultra-low-ambient to -50F. When a standard model doesn't quite fit, they'll build a custom unit to your exact requirements.

Applied Environmental Air is a leading manufacturer of quality water sourced heat pumps, fan coils and air-handlers; in capacities from 3/4 to 20 Tons. American Made High Quality Manufacturing: With over 600,000 square feet, and growing, of production facilities located in Dallas, Texas, AE-Air is one of the largest fan coil manufacturers in the US with both the most up-to-date manufacturing equipment available and a stable, experienced, highly skilled workforce.
