

Gideon 5V Panel™

Exposed Fastener Panel / Through-Fastened Panel Roof and Wall Systems

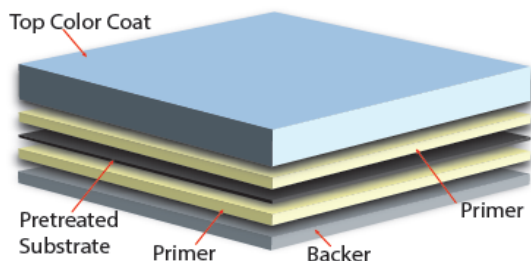

The 5V profile dates back to installations over 7 decades ago being found on old farm and ranch house projects demonstrating a classic metal roof profile. Standing the test of time, 5V profile has made a come back being found on coastal seaside areas and inland on modern craftsman style and urban farm house style homes. Gideon 5V Panel brings back a vintage tradition with modern influence being offered in a wide variety of color options or the classic Galvalume.

Gideon Steel manufactures Investment Grade metal components and panel that is attractive, affordable and can be enjoyed for decades. Strict quality control and raw material sourcing ensures that you receive products that are made to endure harsh weather and environmental conditions such as hail, wild fires, and high winds.
