ArcelorMittal

Single Engine Fuel Economy Test under operational condition at ArcelorMittal South Africa – Vanderbijlpark

Test Engine:

Caterpillar Loco Engine No. 64

Test Period:

09/16/2017 – 12/16/2017

Location:

ArcelorMittal South Africa – Vanderbijlpark

Reliability Engineering Department

Goal:

**To establish confirmation of improved fuel economy
with**

**Omstar Dx1 Synthetic Ester
added to the Engine Oil and Fuel**

Oil contamination Test Nitrification Level

Sample Number: 362824
 Customer: Loco Shop
 Site: Loco
 Machine: LOCO NO.64
 Unit: Engine

Test value versus Sample Date

- NIT / Nitration Level
- NIT / Nitration Trendline
- NIT Max Limit
- NIT Min Limit

Oil contamination Test Chromium Level

Sample Number: 362824
Customer: Loco Shop
Site: Loco
Machine: LOCO NO.64
Unit: Engine

- Cr / Chromium Level
- Cr / Chromium Trendline
- Cr Max Limit
- Cr Min Limit

Test value versus Sample Date

Omstar Dx1

No Chromium particles detected in the oil
