About Company

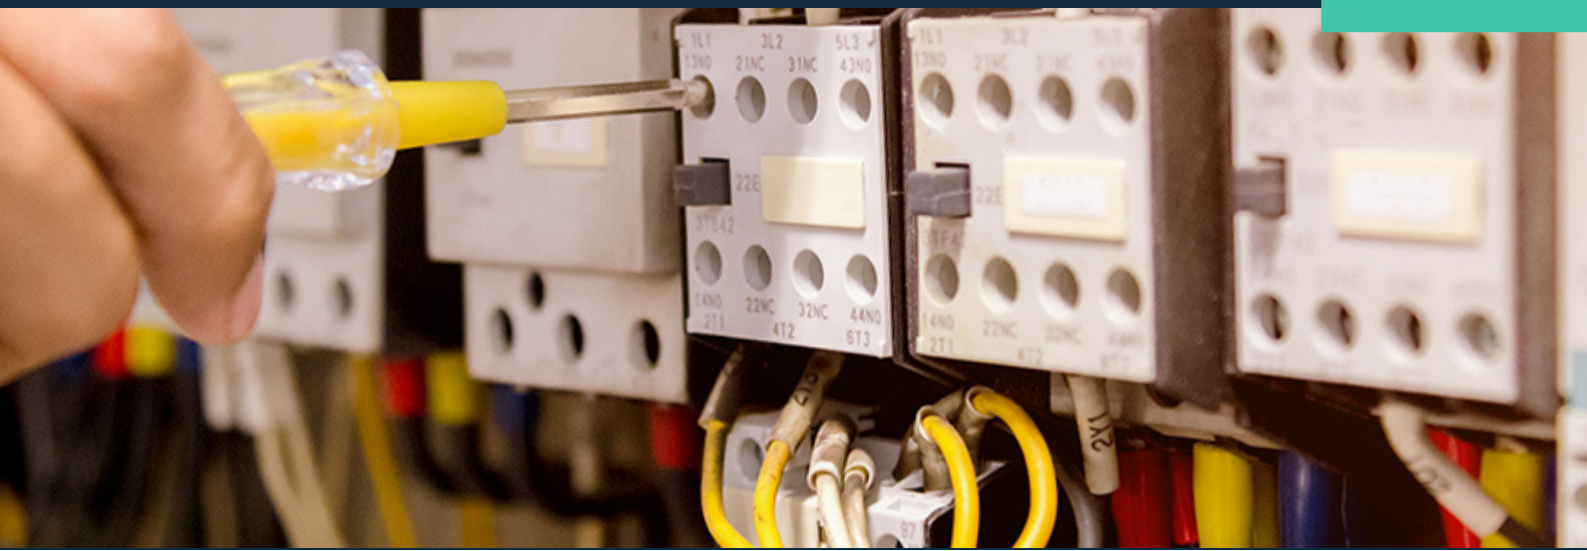

NuTech Power in partnership with **Cato Ridge Electrical Construction (CREC)** are leading suppliers of backup services for all Prime and Standby generators ensuring minimal downtime and maximum efficiency.

With offices in Gauteng and KZN, we specialize in the supply, installation and after sales servicing of Commercial and Industrial Diesel Generators.

Our solutions are provided to Industries such as manufacturing, Industrial Factories, Shopping Centers, Business Parks, Hospitals and other operations where uptime is critical.

Our experienced team of professionals is driven to deliver professional assistance and support on Installations, Power Generator Rentals, Custom Generator Services, Synchronized Systems, and Power

NuTech Power in partnership with Cato Ridge Electrical Construction (CREC) distribute for Industrial, Commercial application and we offer a turn-key solution to our clients (Electrical & Civil)

Our Services

We pride ourselves on the ability to provide unique power solutions which reflect the mission-critical nature of the industry that we serve.

Diesel Generator Sales

We offer a comprehensive range of custom-built standby generators ranging from 100kVA – 2200kVA from leading brands including Perkins, Volvo John Deere, MTU, Doosan and Baudouin. Stamford, Marelli or Leroy Somer Alternators are used across the range. We make use of only the most reliable and trusted Commercial Generator Manufacturers for industrial generator production and manufacturing.

Our experienced team of Engineers can assist with reliable advice, system design, site surveys, tailor made solutions for each application and accredited installation.

Features of our Diesel Generators:

- Size Range starts from 100Kva to 1250Kva (Contact us for higher capacities)
- Sound Attenuated Weather Proof Generator Enclosures.
- 1 Year Warranty and Maintenance with purchase.
- Manual Start or Automatic Change Over.
- Switchgear SABS Approved
- Available Voltage Range 400V-1100V
- Flexible lead-time to meet customer needs.
- Team of technical experts that are available for assistance in design and development of genset and back-up power systems.
- Additional Generator Maintenance Contracts is available.

Our Services

Industrial Generator Hire

NuTech Power is on standby with various sized Diesel Generator for short term or long term hires ranging from 100kVA up to 1250kVA

Our Generator rental division is on call to help you find the solution you need to ensure you maintain productivity and continue operation throughout load shedding and power outages.

Solutions can be provided ranging from single commercial generator installation to multiple generators. Our project team will work closely with you ensuring your rental unit is installed and commissions safely and successfully with minimal disruption to your operation. We also manage the maintenance and servicing for the duration of the rental period.

Whether you need a temporary back-up generator or long term hire we can design a rental package unique to your business.

Our Services

Generator Maintenance & Repairs

We understand the importance of after –sale service and are dedicated to provide trusted technical support with preventative maintenance to minimize downtime.

With offices in Gauteng and KZN our Technical Support team is available for Generator services, repair and maintenance. Our dedicated after sales service technicians only utilise trusted genuine generator parts, filters, oil & coolant and can service, maintain and fault find electrical or mechanical faults on site.

Key Areas:

- Minor and Major Service.
- Customized and specialized maintenance solutions.
- Panel Upgrades.
- Generator Maintenance, Fault Finding and Repairs.
- Maintenance Service Level Agreements.

Specialised equipment requires ongoing maintenance after warranties have expired. The average Diesel Generator needs to be serviced yearly or at 250 running hour, whichever comes first.

Preventative / Routine maintenance is essential in minimizing the risk for costly repairs down the line and give confidence that all elements of your power system remain in full working order when there is rolling power cuts or when the grid is down.

Experienced technical teams can assist with the following engine brands:

- | | |
|--------------------------------|-------------------------------|
| • Cummins Generator | • Doosan Generator |
| • Perkins Generator | • FAW Diesel Generator |
| • Volvo Penta Diesel Generator | • Lovol Generator |
| • Caterpillar Generator | • Mitsubishi Motors Generator |
| • Deutz Diesel Generator | • Baudouin Generator |

Our Services
