

1. Did a voiceover using Adobe Audition. I used it for the intro for the video.

1. Got the logo from my boss via email

2. Location of the shoots

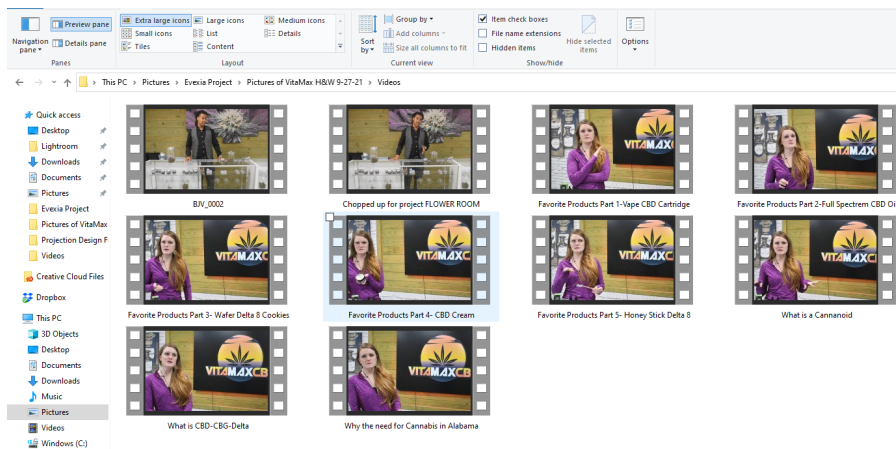

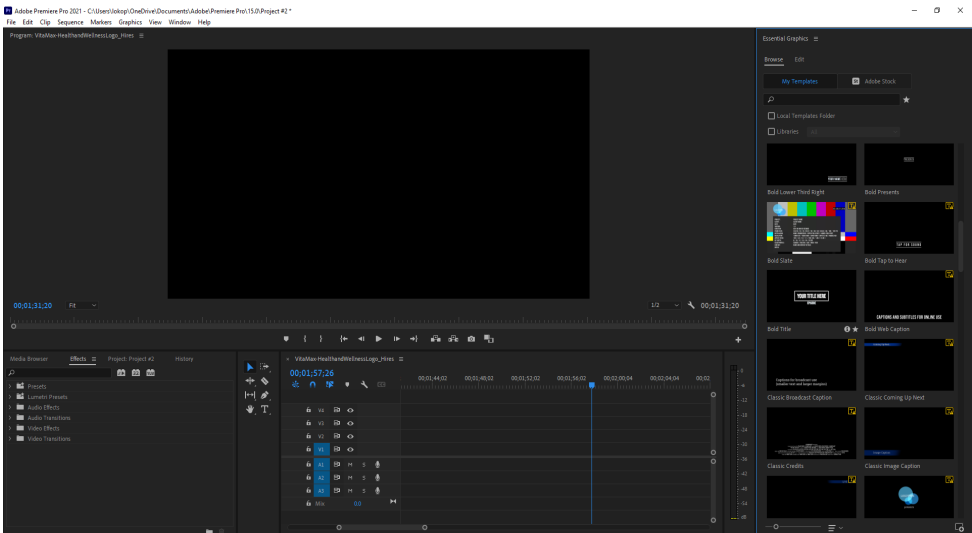

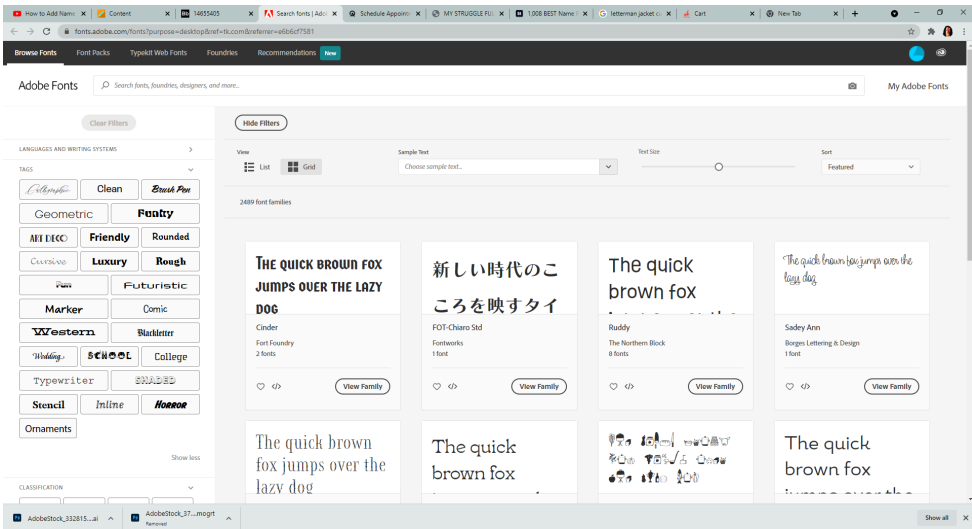

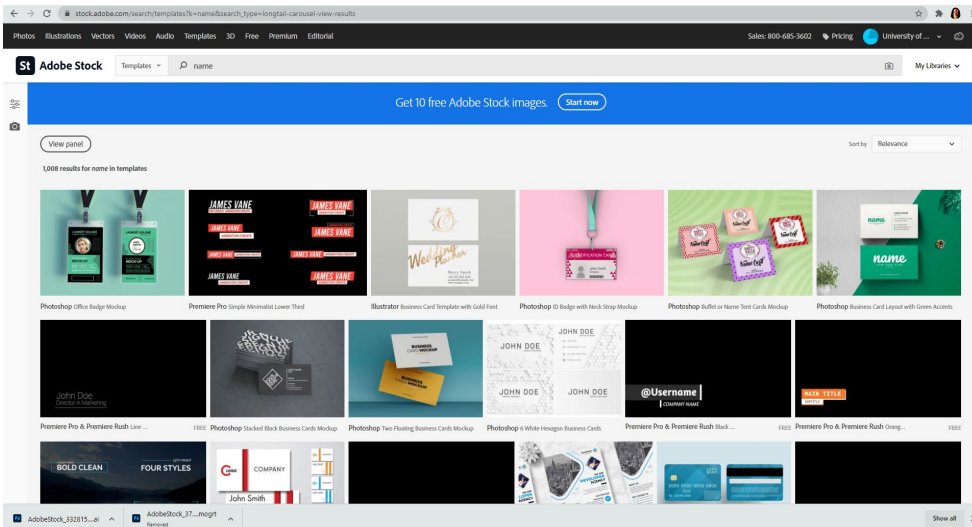

3. Cutting the video down to under 2 minutes

4. Using YouTube and google to figure out how to do the name tags at the bottom. I figured out after failed downloads that the stuff I was looking for was already in the program. While searching that I learned how to do.

5. Afterwards I Chose 3 videos out of the 10 that was available to keep it no longer than 1 minute and 40 secs. Next, I went down that Essential Graphics list and found my choice for a name & title black for the people in the video. All I did was type in our names and job title. Also, I put transitions on everything to make it make a more seamless video.

6. Completed product
