TRI-SSI

An LLC Company

Creating Strategies for your Asset's Reliability Needs

Taking Compliance to the Next Level

Stop Assuming and Start Knowing!

TRI-SSI, LLC -
Consulting, Software and Hardware for your Process and Asset needs.

TRI-SSI
Consulting. Monitoring. Asset Management.
Artificial Intelligence in a Real Environment

Industrial Internet of Things – IIoT (Pure I/O)

Bring your Asset Information to life by reviewing its reliability basis and activating the Maintenance Strategy.

Allow your Assets to collect information around their functions and then report outwardly on their own health with Reports, Visual Presentations and Alerting Notifications.

All Assets presented on a common platform

You have information in many locations. Much of it never integrates with other information because of too many platforms. Bring it all together so it can start communicating under one roof.

Allow your Assets to get the information that's important to each. Once populated, allow your Assets to "self-report".

Protection from failure?

Reality is, things fail … However, knowing how they fail and putting in a strategy that identifies a potential failure is key to sustainable reliability and a well-planned organization.

Focus on Strategy and Execution

TRI-SSI, LLC involvement starts with identifying critical assets. Once that's done all critical assets are provided with an Engineered Reliability Strategy that provides tasks to be performed. Next, enter in, Pure I/O for monitoring, reporting and notifying.

Pure I/O is an Asset Management tool used by industry professionals to support information gathering and automated reporting. Read an industry leader's comments below:

"lots of work has gone into improving maintenance strategy, operations and equipment checks. These efforts have contributed to very impressive numbers" — Customer's statement after setting reliability records held for 23 years

Pictured – LevelWeb™ Cellular Technology

The Simple Strategy:

- Know your Assets and their Criticality
- Define Assets' Strategy for Success
- Implement Automation into Reliability

Key Offerings

TRI-SSI, LLC can review and identify all of your critical assets, build the strategy for success and implement an automated process for assured reliability.

The Total Package

Reliability, for industrial, commercial and municipality type industries is foundational for customer satisfaction. TRI-SSI takes the cumbersome efforts of identifying, creating and implementing strategies to a more streamlined approach that, in the end, provides greater oversight with quicker notifications and involvement of key personnel. Thus, elimination of surprises and greater awareness of Asset Health and Product Assurance!
