In the Name of יהוה, most beneficent, most merciful, knower of the seen and unseen;

Governance is the maintaining of balance. Regardless be that understood as an individual or governing body. The smallest form of governance is the self limiting the self from animalistic desires, and behaviors. To shun and discipline the loss of ones ability to govern ones self. As the smallest nation is indeed the self.

Firm Governance in regards to the preservation of inalienable liberties can only be as firmly rooted as a body is consciously. Like that of the seed, and depth in which the seed sprouts by the creators guidance alone taking deep root not out of desperation, but preservation of all sentient kingdoms around oneself.

The act of violence is like that of the animal. The animal functions from desire of the flesh, while a human man and woman are only competent as individuals thither as individuals are responsible for holding themselves to the maintenance of being a sentient being of which is driven by cognitive enlightenment.

Cognitive Enlightenment can only exist, when the ruling Dynasties of a given territory surrender themselves to be governed by the matriarchal wisdom of compassion, forgiveness, and patience.

is the spiritual death, and resurrection of the self internally. To literally fall asleep with the hardened intent to be better. To better ones self upon ethical, and moral principles of Chivalry. Not for the preservation of ones self but that of ones Community.

The moment the individual citizen human psyche is made competent of the purity in. Which we as individuals are to maintain ourselves physically, spiritually, and psychological are the very determining factor upon the preservation of equality.

Many religions teach of a man and woman whom are responsible to bring about a great moment of enlightenment, justice, and equality. It is not the presence of the deliverance of a messiah in human flesh, and blood of which is the key to humanity's deliverance.

Our deliverance as a species is solely dependent at this moment, upon the ruling 1% of whom Jehovah has entrusted great responsibility in which to guide and govern the development of mankind to make the self conscious decision to abandon the destructive aspects of a patriarchal system of governance. A governance of which posses no more competency than that of the head of a male Phallus.

Mankind among all its diversities, must surrender to the the edict given to all of our creator's creations. Not to envy nor persecute another do to the physical, or material possession of which the creator has guided the governing bodies and its representative authorities to bestow upon a person. To leave cohesively with the ecological kingdoms around ones dwellings.

The patriarchal theory is survival of the fittest. The matriarchal theory is like that of the mycelium of which makes of our air, water and lands. Mycelium networks of which form the very central nervous system of the earth in regards to communicating the various needs of multiple plant, fungus, and animal kingdoms without discrimination.

The Myceliual Kingdoms of earth that encompass the superior intellect of which all of mankind should seek the creator to obtain. The intellectual competency that all life is precious. That it is the 1% whom above all whom are to embody, and imbue the essence and practice of chivalry and its preservation among all earths social classes.

That all of mankind be provided the basic sociological, and psychological competencies in which all persons regardless of ones race, religion, or creed might have a. Firm foundation in which to develop a relationship with the creator in pursuit of the preservation and maintenances of which we all collectively play individual parts in sustaining the basic necessities in which we may all enjoy the standard of collective contentness.

That we may all continue preservation of Revolution within ourselves in holding to the standards of Frömmigkeit, to as a collective society we might grow as one upon the Commandments in which the Messenger Obadiah of our creator has delivered by way of the message in Al-Sirach (The Book of Wisdom: Last book of Moses).

Apophis will present challenges of which strain the psychological, physical, and Emotional challenges. Challenges that can not exist upon the day of Apophis arrival. The acknowledgement of an individual, elected or non-elected government body. The private, and public admittance that it is the individual, family, community, state, and nation as a whole. That it is the grand consciousness of the creator, of whom is the supreme authority upon the ease or difficulty in which an individual or nation is to endure.

Respectfully,

Rabbi M. Obadiah
