

Built for Clover POS Users

Ordering Kiosk

by nanonation

Adding self-service ordering to a restaurant has never been easier. The Clover Ordering Kiosk brings together best-in-class solutions for a seamless way to take and manage more orders in one spot.

- **The device** itself is an enterprise-grade Samsung KM24A Kiosk – built specifically to stand up to years of use in a self-service environment.
- **The software** driving the kiosk is created by Nanonation, a top provider of interactive kiosk solutions.
- **The POS system** at the heart of the solution is, of course, powered by Clover.

→ Drop-in solution

New and existing Clover POS customers can be up and running in no time.

→ Fast and efficient

Add one kiosk to support counter service or multiple kiosks for a full self-service ordering experience – and keep the lines moving.

→ Cost-effective

With affordable hardware and a low monthly cost per kiosk, you'll be seeing ROI quickly.

Ordering Kiosk

by nanonation

→ The hardware

- A Samsung 24" commercial touch screen with antimicrobial coating
- Countertop, floor stand, and wall mount options
- Clover Flex payment terminal
- Uses standard 3-1/8" thermal receipt paper.

→ The software

- Connects to and pulls your menu directly from your Clover POS system – keeping your items and pricing in sync
- Orders show on your KDS or print to your kitchen printer just as if they were placed at your counter
- Easily turn categories, menu items, and modifiers on and off using a web-based tool
- Add your own promotions, specials, and more to a content loop that runs when the kiosk is inactive
