COMPANY OVERVIEW

Founded in 2016, CFWright Consulting, LLC is a specialized airport consultancy providing comprehensive services in airport programming, planning, design, and construction management and administration. As a small, agile firm, CFWright offers personalized, one-on-one client service free from the multi-layered management structures of large organizations. We act as an extension of our clients' teams, emphasizing collaboration, responsiveness, and consensus building to ensure successful project outcomes.

REPRESENTATIVE PROJECT EXPERIENCE

Los Angeles International Airport (LAX): Infrastructure planning, design, and construction administration for major capital projects including Concourse 0 / Terminal 1-East, the $3B Terminal 9, and LAMP Phase-2 CTA ground access roadways. Preliminary design (15%) of the $700M Sepulveda Blvd. / W. Century Blvd. / CTA Interchange as part of the ATMP environmental document, with program management support for design and construction of the interchange.

San Diego International Airport (SAN): Landside program management for the $3.4B New Terminal 1 Program, including new parking garage (5-story, 5200 spaces), elevated departures roadway, and commercial ground transportation plaza. Assist with programming of sterile connector between NT1 and Terminal 2 East.

San Francisco International Airport (SFO): Program Management Support Services for $800M in projects including the Second Long-Term Parking Garage (6-story, 3,600 spaces), Plot 2 RON Apron Expansion, South McDonnell Road Realignment, Airport Hotel Program, and Air Train Extension.

Orange County / John Wayne Airport (SNA): Programming support and airport engineering services.

CORE COMPETENCIES

CFWright's team brings integrated expertise across the full airport development lifecycle, including airport infrastructure planning and design; program and project management, including Program Management Office (PMO) support; construction management and administration; staff augmentation, owner's representation, and stakeholder consensus building; security/utilities/revenue systems integration; sustainable development, environmental planning and documentation, and master planning; landscape and land-use planning; peer reviews and quality control; scheduling and phasing coordination; staff training and workforce development program design; airside and landside design; and civil engineering and site development.

DISCIPLINE AREAS

Technical Disciplines	Operational Disciplines
Civilian Engineering Support (Land Side and Air Side)	Staff Training and Operational Optimization
Terminal Expansion	Workforce Development
New Construction	Integration with Urban Mobility Networks
Program Management and Owner's Representation	Enhanced Retail and Hospitality Offerings

Safety and Quality	Environmental Planning and Documentation
Accessibility Improvements	Passenger Experience and Amenities

DIFFERENTIATORS

- Deep expertise across both airside and landside systems
- Proven track record delivering complex, multi-billion-dollar airport programs
- Consensus-driven approach fostering collaboration among diverse stakeholders
- Client-first philosophy: responsive, flexible, and transparent partnership
