

REGISTERED IMPORTER NEWSLETTER No. 63

National Highway Traffic Safety Administration

Office of Vehicle Safety Compliance

December 14, 2017

Federal Motor Vehicle Safety Standard No. 138 *Tire Pressure Monitoring Systems*

On February 2, 2015, we issued Registered Importer Newsletter No. 50, addressing the importation of Canadian-certified vehicles subject to Federal Motor Vehicle Safety Standard No. 138 *Tire Pressure Monitoring Systems (TPMS)*. The newsletter stated that to be eligible for importation under the blanket eligibility decisions that apply to Canadian-certified vehicles, and be thereby covered by vehicle eligibility numbers VSA-80 and VSA-81, a Canadian-certified passenger car, or a Canadian-certified multipurpose passenger vehicle, truck or bus with a gross vehicle weight rating (GVWR) of 4,536 kilograms (10,000 pounds) or less, that is manufactured on or after September 1, 2007, must be originally manufactured with a TPMS that fully complies with the requirements of FMVSS No. 138. The newsletter further stated:

Any such vehicle that was not originally manufactured with an FMVSS No. 138-compliant TPMS cannot be imported under vehicle eligibility numbers VSA-80 or VSA-81 unless the vehicle has been retrofitted, prior to entry into the United States, with a TPMS identical to, and with the same part number as, the TPMS installed on vehicles manufactured for sale in the United States by the original manufacturer (OEM).

The newsletter had two appendices. Appendix A contained a list of Canadian-certified vehicles that were not originally equipped with FMVSS No. 138-compliant TPMS. The newsletter stated that any vehicle listed in Appendix A cannot be imported under vehicle eligibility numbers VSA-80 or VSA-81 unless an OEM TPMS is installed in the vehicle prior to entry, and the RI proves, in the conformity package that it submits to NHTSA to obtain release of the DOT Conformance bond, that such a system has been installed. The only acceptable proof would be an invoice from a franchised dealership or authorized repair facility of the original manufacturer showing that an OEM TPMS has been installed, along with a photograph of the vehicle's dash showing the TPMS telltales illuminated.

Appendix B to the newsletter contained a list of Canadian-certified vehicles on which an FMVSS No. 138-compliant TPMS was available as optional equipment. The newsletter stated that any vehicle listed in Appendix B cannot be imported under vehicle eligibility numbers VSA-80 or VSA-81 unless the optional FMVSS No. 138-compliant TPMS was installed on the vehicle as originally manufactured, or an OEM TPMS is installed in the vehicle prior to entry, and the RI proves, in the conformity package that it submits to NHTSA to obtain release of the DOT Conformance bond, that such a system has been installed. For vehicles with an optional FMVSS No. 138-compliant TPMS installed as original equipment, acceptable proof would consist of written confirmation from the manufacturer or a photograph of the vehicle's dash showing the TPMS telltales illuminated. For vehicles originally manufactured without a TPMS that complies with FMVSS 138, the RI must furnish proof that an OEM TPMS was installed prior to entry. As noted above, the only acceptable proof that the vehicle has been made to conform would be an invoice from a franchised dealership or authorized repair facility of the original manufacturer showing that an OEM TPMS has been installed, along with a photograph of the vehicle's dash showing the TPMS telltales illuminated.

On July 27, 2016, we published the most recent revisions to appendices A and B as RI Newsletter No. 55. We have since requested further updates from manufacturers whose vehicles are listed in those appendices, and those updates are reflected in the revised appendices below.

If you have any questions, please contact Mr. Johnny Gibson at (202) 366-3556.

Appendix A: Canadian-Certified Vehicles Not Originally Manufactured with FMVSS No. 138-Compliant TPMS

MAKE	MODEL	MODEL YEAR
