Graduation January 2000

Bio

Gregory Hunsicker is the founder and Managing Member of OnPoint. He has been engaged in the post-tensioning industry since 1999 shortly after graduating from the University of Massachusetts. Through his experience, he strongly believes that safety, quality and efficiency are interwoven and are core values in the approach to delivering successful projects.

He has worked on many types of structures including both new construction and repair / strengthening. This includes bridges, parking structures, containment structures, residential and office buildings, strand jack heavy lifting and foundations. While most of his experience has been in the field of post-tensioned concrete he has been involved with other materials as well as various construction methods and equipment.

He has been engaged in industry organizations such as ASBI and PTI and serves on several committees as well as a trainer for field personnel certification courses.

During his career he was fortunate to be given the opportunity to work within several areas including Project Management and Field Operations, Engineering and Shop Drawing Development, Estimating and Sales, and Manufacturing. He is extremely grateful for the experiences and knowledge that have been shared with him by his mentors and peers. He is a proven leader and has been proud of the success of his teams he has worked with in the past.
