## Introducing DuraClean.

How many of us have ever spilled coffee, juice, or even wine on the sofa and then watched in horror as it soaked in? Or maybe you've got kids, pets, or guests who treat your living room like a jungle gym. Accidents happen... but stains don't have to.

Dura Clean is more than just a fabric coating. It's peace of mind. It's a fabric protection solution designed specifically for your sofa—and your investment—from everyday messes.

Here's what makes Dura Clean the smart choice:

- **2 Level Protection** – At first level any spills are repelled and prevented from soaking into the fabric. The second level is a propriety releasing property that prevents most stains becoming permanent.
- **Stain-Resistant Technology** – From muddy paw prints to wine spills, Dura Clean helps keep fabrics looking like new. It doesn't just protect—it preserves.
- **Odour-Blocking Formula** – Spills that get absorbed can cause odours. Dura Clean seals out moisture, helping prevent the build up of smells in your upholstery.
- **Safe on All Fabrics** – Whether your sofa is linen, cotton, polyester, or a blend, Dura Clean works without changing the look, feel, or breathability of the fabric.
- **Non-Toxic and Eco-Friendly** - Safe for kids, pets, and the planet. No harsh chemicals—just smart, safe protection.

With Dura Clean, you no longer have to choose between comfort and durability. Your sofa becomes a space to live in—worry-free.

Protect your sofa. Protect your peace of mind. Choose DuraClean.
