

ISO 45001 Internal Auditor (016)

Turn auditing into a strategic advantage

Course overview:

This one-day course is designed to equip participants with the essential skills and techniques needed to perform effective internal audits of an Occupational Health and Safety Management System (OHSMS) in accordance with ISO 45001.

Prerequisite:

A solid understanding of ISO 45001 or take the ISO 45001 Basics course or equivalent.

Course Objective:

This course is designed to enhance participants' understanding of the internal auditing process for ISO 45001. The course also aims to develop the necessary skills to effectively manage and carry out an internal audit from beginning to end. Additionally, it seeks to build participants' confidence in assessing and improving the performance of an OHSMS.

What you'll learn:

- Conduct a document and record review
- Prepare and execute an audit plan
- Perform effective audit interviews
- Identify key areas of focus during OHSMS audits
- Report findings clearly and accurately
- Follow up on corrective actions with confidence

Who should attend:

- Individuals responsible for ISO 45001
- Future OHSMS internal auditors

Duration and Delivery:

1 day, instructor led, either on-site or virtual

Flexible and Customisable

Cost:

\$2,500.00 (CDN) + taxes, instructor led, either on-site or virtual

- Instructor travel costs not included
