

EMS Awareness Training (014)

Build a solid foundation for environmental leadership

Course overview:

This concise, focused workshop is ideal for individuals seeking a general understanding of EMS principles. Your own EMS materials can be included into the course, i.e. Environmental Policy, Significant aspects and Environmental Objectives.

Prerequisite:

None required.

Course Objective:

To provide a solid introduction to Environmental Management Systems and the ISO 14001 standard — equipping participants with the foundational knowledge needed to understand how EMS applies to their organization or industry.

What you'll learn:

- The context and purpose of an Environmental Management System (EMS)
- How to identify environmental aspects and impacts
- The key clauses of ISO 14001 relevant to EMS implementation

Who should attend:

- All employees

Duration and Delivery:

1 hour – instructor led, on-site or virtual

- Your own EMS materials included into the course, i.e. Environmental Policy, Significant aspects and Environmental Objectives

30 min. – self-paced course

Flexible and Customisable

Cost:

\$800.00 (CDN) instructor led, limit for students is only limited to classroom size

- Discounts available for multiple deliveries in one day
- Instructor travel costs and taxes not included
