

ISO 14001 Basics (027)

Start your journey toward smarter environmental management

Course overview:

This one-day introductory course is designed to give you a strong foundation in ISO 14001 Environmental Management Systems. Whether you're new to EMS or looking to strengthen your understanding, this course offers the essential knowledge to help you align your organization with environmental best practices.

Prerequisite:

None required.

Course Objective:

To provide a clear and accessible overview of the ISO 14001 standard, including its structure, all key elements, and an introduction to environmental aspect identification and impact assessment.

What you'll learn:

- Understand the structure and key requirements of ISO 14001
- Recognize the legal and regulatory implications of environmental management
- Assess your organization's current environmental practices
- Learn how EMS supports business success and benchmarks best practice
- Understand international environmental policies
- Share insights and gain professional recognition within your team (in-class format only)

Who should attend:

- Anyone seeking a general understanding of ISO 14001 and EMS principles
- New team members involved in environmental compliance or sustainability
- Professionals considering ISO 14001 certification for their organization

Duration and Delivery:

1 day – instructor led, either on-site or virtual

Flexible and Customisable

Cost:

\$2,500.00 (CDN) up to 10 participants

- Extra fees for additional students
- Travel costs for on-site instructor not included
