

Environmental Aspect Identification and Evaluation (041)

Discover how to make smarter, greener decisions

Course overview:

Gain the knowledge and tools needed to identify and evaluate environmental aspects and impacts in alignment with ISO 14001. This practical, interactive workshop will help you build a stronger Environmental Management System (EMS) and contribute to sustainable operations within your organization.

Prerequisite:

Basic knowledge of environmental issues is recommended.

Course Objective:

To help participants confidently assess environmental aspects and impacts as part of building or improving an EMS. Expect hands-on exercises and real-world group discussions to reinforce your learning.

What you'll learn:

- Key environmental aspects and their impacts
- ISO 14001 requirements for aspects and impacts
- How to identify aspects and evaluate impacts using structured techniques
- Best practices for documenting environmental aspect procedures
- How to link significant aspects to relevant ISO 14001 clauses

Who should attend:

This workshop is ideal for:

- Environmental professionals and consultants
- EMS implementation and maintenance teams
- Environmental auditors
- Management Representatives
- Impact assessment and evaluation teams

Duration and Delivery:

4 hours.

Available as either instructor led in person or virtual training and self-directed, computer-based e-learning.

Flexible and Customisable

Cost:

\$1,250.00 (CDN) + taxes

Up to 10 students

(On-site courses, instructor travel costs are not included.)
