

# HOUSING ACCESS IS THE MISSING LINK TO EDUCATIONAL EQUITY

in the Greater Atlanta Area

**\$365,565**

**30  
Families**

**75  
Students**

A District-Level Analysis of Enrollment, Housing Costs, and Opportunity Gaps in Atlanta's Highest-Performing School Districts.

Atlanta is home to some of the highest-performing public school districts in Georgia. Yet access to these districts remains deeply unequal.

Despite representing 36.5% of students statewide, Black or African American students are **significantly underrepresented in greater Atlanta's top-ranked school districts**. This disparity is not driven by academic readiness or family ambition, but by housing costs that far exceed the support available to families who qualify for assistance.

This report examines ten of greater Atlanta's highest-performing school districts and demonstrates how targeted philanthropic investment in housing access can unlock educational opportunity at scale.

**An investment of \$365,565 provides:**

- **30 families** access to stable housing in high-opportunity districts
- **75 students of color** entry into top-performing public schools
- **Measurable reductions** in district-level equity gaps
- **Stronger, more inclusive communities** throughout Greater Atlanta

This analysis is designed to support grantmakers, foundations, and partners seeking data-driven, outcomes-oriented approaches to educational equity.

# High-Performing School Districts Remain Structurally Inaccessible

Throughout greater Atlanta’s highest-ranked public school districts, Black or African American students remain significantly underrepresented relative to the statewide average of 36.5%.

Despite the area’s strong academic outcomes overall, enrollment patterns reveal **persistent inequities in access** to the districts most closely associated with educational opportunity.

## Black Student Enrollment in Greater Atlanta’s Top-Ranked Districts

School District	% Black or African American Students	Equity Gap vs. State Average
Bremen	4.6%	-87.4%
Buford	11.2%	-69.3%
Calhoun	6.1%	-83.3%
Carrollton	32.4%	-11.2%
Decatur	18.5%	-49.4%
Fayette	29.7%	-18.6%
Forsyth	4.7%	-87.1%
Jefferson	7.7%	-78.9%
Lowndes	23.3%	-36.2%
Oconee	3.8%	-89.6%

## Why This Matters

In each of these districts, **underrepresentation reflects structural barriers** rather than differences in academic readiness. Housing affordability remains the primary factor determining who can live in, and attend school within, these communities.

### Data Notes

- District rankings are based on 2025–2026 data from U.S. News & World Report and Niche.com.
- Enrollment data sourced from the Georgia Department of Education's CCRPI reporting system, academic year ending June 2026.
- Equity Gap reflects the difference between district-level Black or African American student enrollment and the statewide average.

# Housing Costs Function as the Gatekeeper to Educational Access

Within greater Atlanta's highest-performing school districts, housing costs—not eligibility or academic readiness—determine who can access opportunity.

Families receiving housing assistance face market rents that far exceed allowable support levels. The resulting gap makes these communities effectively inaccessible, even when families qualify for assistance and schools have capacity.

## Average Monthly Housing Costs in Greater Atlanta's Top-Ranked Districts

School District	Market Rent	Housing Assistance	Monthly Housing Gap
Bremen	2,381	1,554	-827
Buford	2,940	1,554	-1,386
Calhoun	2,553	1,554	-999
Carrollton	2,174	1,554	-620
Decatur	2,272	1,554	-718
Fayette	2,179	1,554	-625
Forsyth	2,231	1,554	-677
Jefferson	2,399	1,554	-845
Lowndes	2,352	1,554	-798
Oconee	2,369	1,554	-815

## Why This Matters

In each of these districts, underrepresentation reflects **structural access constraints**, not differences in student ability or family aspiration. Housing affordability, not eligibility, determines who can live in these communities and, by extension, who can attend their public schools.

Until this final affordability gap is addressed, access to Georgia's highest-performing schools will remain constrained, regardless of demand, readiness, or policy intent.

---

## Data Notes

- Market rents reflect average monthly costs for three-bedroom homes, inclusive of utilities.
- Housing assistance reflects combined Housing Choice Voucher payments and utility allowances.
- Sources include Zillow, Realtor.com, Redfin, RentCafe, Apartments.com, local MLS listings, and Public Housing Authority schedules.

# Targeted Housing Capital Unlocks Educational Access

The housing gaps identified in this analysis are **precise, predictable, and solvable**. By deploying targeted capital to bridge the difference between market rents and existing housing assistance, A Welcome Home Inc converts housing access directly into school access.

This model does not replace public systems or require policy change. It operates **within existing housing and education infrastructure**, addressing the final affordability constraint that determines where families can live—and where children can learn.

Funding Impact By District			
School District	Annual Donor Support	Cost Per Student	Equity Gap Reduction
Bremen	29,772	3,970	1.0%
Buford	57,960	7,728	0.5%
Calhoun	37,404	4,987	0.6%
Carrollton	32,436	4,325	3.3%
Decatur	37,836	5,045	0.7%
Fayette	33,912	4,522	0.6%
Forsyth	30,576	4,077	0.0%
Jefferson	36,792	4,906	0.6%
Lowndes	30,384	4,051	0.5%
Oconee	38,496	5,133	0.3%

## Why This Approach Works

Our model produces measurable results with limited, targeted investment:

- Small per-student investments produce **district-level change**
- Capital deployment scales predictably across regions
- Outcomes are transparent, measurable, and verifiable

Rather than diffusing resources broadly, this approach concentrates capital where it has the greatest leverage: **at the intersection of housing access and educational opportunity**.

# What This Investment Makes Possible

This analysis demonstrates that educational inequity in the greater Atlanta area's highest-performing school districts is not driven by academic readiness or family eligibility, but by a narrow and solvable housing affordability gap.

A single, targeted investment can unlock access to opportunity for families who are otherwise excluded from high-performing schools.

---

## Investment Summary

### **\$365,565**

Provides stable housing for **30 families** across greater Atlanta's highest-ranked school districts

### **75 students of color**

Gain access to top-performing public schools at an average cost of **\$4,874 per student**

### **Measurable impact**

A **0.5% increase in student enrollment** reduces district-level equity gaps by approximately **0.3%**

### **Stronger communities**

Families integrate into districts with demonstrated academic excellence and long-term opportunity

---

## Why This Matters Now

Georgia's educational landscape is already defined by excellence. The challenge is ensuring that excellence is accessible. By addressing housing as the final barrier, philanthropic capital can produce **durable, measurable change** without waiting for systemic reform.

# A Clear, Actionable Opportunity for Philanthropic Partnership

A Welcome Home Inc is seeking **\$365,565** to fully fund this initiative across ten of the greater Atlanta area's highest-performing school districts.

This investment will:

- Secure **three homes per district**
- Serve **30 families and 75 students**
- Produce **measurable, district-level reductions in opportunity gaps** within one academic year

Funding may be structured as:

- A single grant
- A pooled foundation partnership
- District- or region-specific sponsorship

---

## Why A Welcome Home Inc

A Welcome Home Inc specializes in bridging the gap between housing assistance and market realities in high-opportunity communities. Our work focuses on precision, accountability, and measurable outcomes—ensuring that philanthropic capital translates directly into access and opportunity.

We work in coordination with public housing authorities, school districts, and local partners to ensure families are placed successfully and supported sustainably.

---

## Next Steps

Grantmakers interested in supporting this initiative or exploring partnership opportunities are invited to connect with us directly.

# Methodology and Data Sources

This report draws on publicly available data and market research to assess enrollment patterns, housing affordability, and opportunity gaps across Atlanta's highest-performing school districts.

## District Selection

- Top ten districts based on 2025–2026 rankings from U.S. News & World Report and Niche.com

## Enrollment Data

- Student demographic data sourced from the Georgia Department of Education's CCRPI reporting system (academic year ending June 2026)
- Statewide Black or African American student enrollment average: 36.5%

## Housing Costs

- Market rents reflect average monthly costs for three-bedroom homes, inclusive of utilities
- Sources include Zillow, Realtor.com, Redfin, RentCafe, Apartments.com, and local MLS listings

## Housing Assistance

- Assistance levels reflect combined Housing Choice Voucher payments and utility allowances as determined by local Public Housing Authorities

## Assumptions

- Average household size: 2.5 students
- Three homes funded per district
- All figures rounded to the nearest dollar

---
